# Weekly Nanos Party Power Index

## *Analysis (Released 11/13/2013)*

The Nanos weekly Party Power Index suggests that the NDP brand is gaining strength although it still trails both the Liberals and the Conservatives. Party Power Index scores stand at 56 for the Liberals, 51 for the Conservatives, 48 for the New Democrats and 32 for the Green Party.

The strength of the Conservative brand has declined over the past week. Of note, the percentage of Canadians who think that Stephen Harper has the qualities of a good leader has dropped seven points in the past four weeks from a high of 57 percent of Canadians to 50 percent in the most recent wave of tracking. On this measure, 54 percent of Canadians thought Trudeau had the qualities of a good leader while 45 percent of Canadians thought Mulcair had the qualities of a good leader.

# Party Power Index

The Nanos Party Power Index Tracking for Canada is based on a composite of the following public opinion measures: the national ballot, which party individuals would consider voting for, the top two choices for Prime Minister, and whether each party leader has good leadership qualities.

The Weekly Nanos Party Power Index Tracking is produced by the Nanos Research Corporation, headquartered in Canada, which operates in Canada and the United States. The data is based on random telephone interviews with 1,000 Canadians (land- and cell-lines), using a four week rolling average of 250 respondents each week, 18 years of age and over. The random sample of 1,000 respondents may be weighted using the latest census information for Canada. The interviews are compiled into a four week rolling average of 1,000 interviews, where each week the oldest group of 250 interviews is dropped and a new group of 250 interviews is added. The views of 1,000 respondents are compiled into a diffusion brand index for each party that goes from 0 to 100, where 0 means that the party has no brand strength and 100 means it has maximum brand strength. A score above 50 is an indication of brand strength for the party and its leader at this time.

The current report is based on a four week rolling average of Canadian opinion ending November 8, 2013.

A random telephone survey of 1,000 Canadians is accurate 3.1 percentage points, plus or minus, 19 times out of 20.

## About Nanos

Nanos is one of North America's most trusted research and strategy organizations. Our team of professionals is regularly called upon by senior executives to deliver superior intelligence and market advantage whether it be helping to chart a path forward, managing a reputation or brand risk or understanding the trends that drive success. Services range from traditional telephone surveys, through to elite in-depth interviews, online research and focus groups. Nanos clients range from Fortune 500 companies through to leading advocacy groups interested in understanding and shaping the public landscape. Whether it is understanding your brand or reputation, customer needs and satisfaction, engaging employees or testing new ads or products, Nanos provides insight you can trust.
