

# ***Canadians' opinions on possible key priorities for the federal budget***

*National survey released February 2016*

*Project 2016-798*

## *Canadians want to see health care and infrastructure as priorities in upcoming federal budget*

Health care and infrastructure are important priorities for Canadians in the upcoming federal budget, and there is widespread support for temporarily issuing Employment Insurance benefits to Canadians in the hardest hit sectors of the economy. There is less consensus on the government providing interest free loans to struggling companies and taking steps to cool down the real estate market.

- **Priorities for the federal budget**

- First ranked – Health care was the most popular first ranked choice for Canadians in terms of what they would like to see as a priority in the upcoming federal budget (43%), followed by infrastructure (28%) and the economy/jobs/stimulus (eight percent). Public safety was ranked first by seven percent of Canadians and the military and environment received four percent each.
- Second ranked – Infrastructure was the most popular second ranked choice by Canadians (31%), followed closely by health care (29%). Public safety received 11% of mentions, while the military was ranked second by nine percent of Canadians.

- **Extending Employment Insurance benefits** – The overwhelming majority of Canadians (85%) either support (47%) or somewhat support (38%) Employment Insurance benefits being temporarily extended to workers in sectors that have been hit particularly hard in the recent economy. Thirteen percent either somewhat oppose (seven percent) or oppose (six percent) doing this.
- **Interest-free loans for struggling companies** – Nearly three fifths of Canadians (58%) support (14%) or somewhat support (44%) the federal government providing interest free loans to struggling Canadian companies, while 21% somewhat oppose this and 16% oppose this action.
- **Government intervention in the real estate market** – Fifty-five percent of Canadians either support (26%) or somewhat support (30%) the government taking action to cool down the real estate market, while 18% somewhat oppose this and 17% oppose this. Ten percent of Canadians are unsure.

These observations are based on an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,000 Canadians, 18 years of age or older, between February 22<sup>nd</sup> to 24<sup>th</sup>, 2016 as part of an omnibus survey. Participants were randomly recruited by telephone using live agents and administered a survey online. The sample included both land- and cell-lines across Canada. The results were statistically checked and weighted by age and gender using the latest Census information and the sample is geographically stratified to be representative of Canada. The margin of error for a random survey of 1,000 Canadians is  $\pm 3.1$  percentage points, 19 times out of 20.

# Methodology

Nanos conducted an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,000 Canadians, 18 years of age or older, between February 22<sup>nd</sup> to 24<sup>th</sup>, 2016 as part of an omnibus survey. Participants were randomly recruited by telephone using live agents and administered a survey online. The sample included both land- and cell-lines across Canada. The results were statistically checked and weighted by age and gender using the latest Census information and the sample is geographically stratified to be representative of Canada.

Individuals randomly called using random digit dialling with a maximum of five call backs.

The margin of error for a random survey of 1,000 Canadians is  $\pm 3.1$  percentage points, 19 times out of 20.

The data presented in this research is part of a joint project by CTV News and Nanos Research.

Note: Charts may not add up to 100 due to rounding.

# Technical Note

Element	Description	Element	Description
Organization who commissioned the research	CTV	Weighting of Data	The results were weighted by age and gender using the latest Census information (2014) and the sample is geographically stratified to ensure a distribution across all regions of Canada. See tables for full weighting disclosure
Final Sample Size	1,000 Randomly selected individuals.	Screening	Screening ensured potential respondents did not work in the market research industry, in the advertising industry, in the media or a political party prior to administering the survey to ensure the integrity of the data.
Margin of Error	±3.1 percentage points, 19 times out of 20.	Excluded Demographics	Individuals younger than 18 years old; individuals without land or cell line could not participate.
Mode of Survey	RDD dual frame (land- and cell-lines) hybrid telephone and online omnibus survey	Stratification	By age and gender using the latest Census information (2014) and the sample is geographically stratified to be representative of Canada. Smaller areas such as Atlantic Canada were marginally oversampled to allow for a minimum regional sample.
Sampling Method Base	The sample included both land- and cell-lines RDD (Random Digit Dialed) across Canada.	Estimated Response Rate	15.6 percent, consistent with industry norms.
Demographics (Captured)	Atlantic Canada, Quebec, Ontario, Prairies, British Columbia; Men and Women; 18 years and older. Six digit postal code was used to validate geography.	Question Order	Question order in the preceding report reflects the order in which they appeared in the original questionnaire.
Demographics (Other)	Age, gender, education, income	Question Content	This was module three of an omnibus survey. Module one was about top unprompted issues of national concern, module two was about vote preferences and questions on the economy.
Fieldwork/Validation	Live interviews with live supervision to validate work as per the MRIA Code of Conduct	Question Wording	The questions in the preceding report are written exactly as they were asked to individuals.
Number of Calls/	Maximum of five call backs.	Survey Company	Nanos Research
Time of Calls	Individuals were called between 12-5:30 pm and 6:30-9:30pm local time for the respondent.
