# Impressions of federal parties – managing the economy and Trump

National survey released May, 2017 Project 2017-1030B

# Canadians say the Liberal Party can manage the economy better than Conservatives and is most likely to be able to work with the Trump administration

Overall Canadians say the Liberal Party has the best program to manage the economy and is the most likely to be able to work with the Trump administration in the US.

- Nearly four in ten Canadians say the Liberal Party has the best program to manage the Canadian economy Asked to look ahead to the 2019 federal election, 38 per cent of Canadians say the Liberal Party has the best program to manage the Canadian economy (up from 25% in 2015), followed by the Conservative Party (30% same as 2015), and the NDP (13%, decreased from 26% in 2015). Two per cent say the Green Party has the best program, while one per cent the Bloc Quebecois. Fifteen per cent are unsure.
- Four in ten Canadians say the Liberal Party is the most likely to be able to work with the Trump administration Forty per cent of Canadians say the Liberal Party is the most likely to be able to work with the Trump administration, followed by the Conservative Party (35%), the NDP (three per cent), the Bloc Quebecois (one per cent), and the Green Party (one per cent). Twenty per cent are unsure.

Nanos conducted an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,000 Canadians, 18 years of age or older, between May 24<sup>th</sup> to 25<sup>th</sup>, 2017 as part of an omnibus survey. Participants were randomly recruited by telephone using live agents and administered a survey online. The margin of error for a random survey of 1,000 Canadians is ±3.1 percentage points, 19 times out of 20.

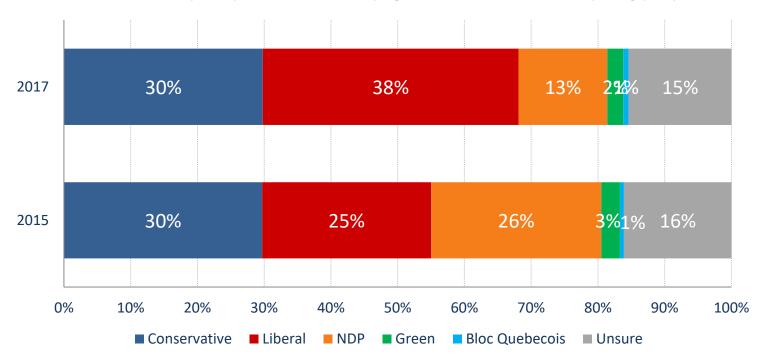

The data presented in this research is part of a joint project by CTV News and Nanos Research.

## Best party to manage the economy

Source: CTV News/Nanos Research, RDD dual frame hybrid telephone and online random survey, May 24<sup>th</sup> to 25<sup>th</sup>, 2017, n=1000, accurate 3.1 percentage points plus or minus, 19 times out of 20. Source: CTV News/Nanos Research, RDD dual frame hybrid telephone and online random survey, August 20<sup>th</sup> to 23<sup>rd</sup>, 2015, n=1,000, accurate 3.1 percentage points plus or minus, 19 times out of 20.

Subgroups	Liberal Party	Conservative Party				
Atlantic (n=100)	54.2%	24.7%				
Quebec (n=250)	44.8%	25.7%				
Ontario (n=300)	42.7%	38.8%				
Prairies (n=200)	26.3%	49.9%				
British Columbia (n=150)	35.3%	30.5%				
Male (n=501)	36.8%	43.7%				
Female (n=499)	43.0%	26.9%				
18 to 29 (n=172)	27.9%	45.4%				
30 to 39 (n=148)	38.2%	37.6%				
40 to 49 (n=192)	40.6%	35.5%				
50 to 59 (n=204)	47.0%	29.9%				
60 plus (n=284)	44.6%	29.4%				

QUESTION – Which federal political party do you think is most likely to be able to work with the Trump administration in the United States?

## Methodology

Nanos conducted an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,000 Canadians, 18 years of age or older, between May 24<sup>th</sup> to 25<sup>th</sup>, 2017 as part of an omnibus survey. Participants were randomly recruited by telephone using live agents and administered a survey online. The sample included both land- and cell-lines across Canada. The results were statistically checked and weighted by age and gender using the latest Census information and the sample is geographically stratified to be representative of Canada.

Individuals randomly called using random digit dialling with a maximum of five call backs.

The margin of error for a random survey of 1,000 Canadians is ±3.1 percentage points, 19 times out of 20.

The data presented in this research is part of a joint project by CTV News and Nanos Research.

Note: Charts may not add up to 100 due to rounding.

The previous wave of research was conducted by means of an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,000 Canadians, 18 years of age or older, between August 20<sup>th</sup> and 23<sup>rd</sup>, 2015 as part of an omnibus survey. Participants were randomly recruited by telephone using live agents and administered a survey online. The sample included both land- and cell-lines across Canada. The results were statistically checked and weighted by age and gender using the latest Census information and the sample is geographically stratified to be representative of Canada. Canadians without internet access or telephone lines were excluded by default.

#### **Technical Note**

Element	Description	Element	Description					
Organization who commissioned the research	CTV News	Weighting of Data	The results were weighted by age and gender using the latest Census information (2014) and the sample is geographically stratified to ensure a distribution across all regions of Canada. See tables for full weighting disclosure					
Final Sample Size	1,000 Randomly selected individuals.		Screening ensured potential respondents did not work in the					
Margin of Error	±3.1 percentage points, 19 times out of 20.	Screening	market research industry, in the advertising industry, in the media or a political party prior to administering the survey to ensure the integrity of the data.					
Mode of Survey	RDD dual frame (land- and cell-lines) hybrid telephone and online omnibus survey	Excluded Demographics	Individuals younger than 18 years old; individuals without land or cell line could not participate.					
Sampling Method Base	The sample included both land- and cell-lines RDD (Random Digit Dialed) across Canada.	Stratification	By age and gender using the latest Census information (2014) and the sample is geographically stratified to be representative of Canada. Smaller areas such as Atlantic Canada were marginally oversampled to allow for a minimum regional sample.					
Demographics (Captured)	Atlantic Canada, Quebec, Ontario, Prairies, British Columbia; Men and Women; 18 years and older. Six digit postal code was used to validate geography.	Estimated Response Rate	XX percent, consistent with industry norms.					
Demographics (Other)	Age, gender, education, income	Question Order	Question order in the preceding report reflects the order in which they appeared in the original questionnaire.					
Fieldwork/Validation	Live interviews with live supervision to validate work as per the MRIA Code of Conduct	Question Content	This was module two of an omnibus survey. The preceding module asked about the top national unprompted issue of concern.					
Number of Calls/	Maximum of five call backs.	Question Wording	The questions in the preceding report are written exactly as they were asked to individuals.					
Time of Calls	Individuals were called between 12-5:30 pm and 6:30-9:30pm local time for the respondent.	Survey Company	Nanos Research					
Field Dates	May 24 <sup>th</sup> to 25 <sup>th</sup> , 2017.		Contact Nanos Research for more information or with any concerns or questions.					
Language of Survey	The survey was conducted in both English and French.	Contact	http://www.nanosresearch.com Telephone:(613) 234-4666 ext. Email: info@nanosresearch.com.					

### **About Nanos**

Nanos is one of North America's most trusted research and strategy organizations. Our team of professionals is regularly called upon by senior executives to deliver superior intelligence and market advantage whether it be helping to chart a path forward, managing a reputation or brand risk or understanding the trends that drive success. Services range from traditional telephone surveys, through to elite in-depth interviews, online research and focus groups. Nanos clients range from Fortune 500 companies through to leading advocacy groups interested in understanding and shaping the public landscape. Whether it is understanding your brand or reputation, customer needs and satisfaction, engaging employees or testing new ads or products, Nanos provides insight you can trust.
