Canadians are more likely to think new Liberal government will be effective at investing in priorities Canadians care about than at managing spending

National survey released November, 2019 Project 2019-1523

NANOS RESEARCH

SUMMARY

Nearly twice as many Canadians say environment should be a top priority as say the same about the economy

Canadians are most likely to think that the new Liberal government will be effective at investing in priorities that Canadians care about, and are less likely to think that the new government will be effective at managing relations with provincial governments and managing spending. More Canadians say that the environment should be a top priority for the new government than say the economy should be a top priority.

- Nearly twice as many Canadians say environment should be a top priority for new government as say the economy should be a priority Almost a quarter of Canadians (24%) say that the environment/climate change/renewable energy should be the top priority for the new Liberal government, while 13 per cent say the economy should be the top priority, followed by 10 per cent who say country unity and reconciliation or pipeline, respectively, and seven per cent who say healthcare.
- Just over half of Canadians think that the new Liberal government will be effective or somewhat effective at investing in priorities which Canadians care about Just over five in ten Canadians think that the new Liberal government will be effective (12%) or somewhat effective (43%), while four in ten say somewhat not effective (20%) or not effective (21%). Four per cent are unsure. Canadians in the Prairies are less likely to say that the government will be effective (nine per cent) or somewhat effective (28%).
- Canadians are split on new Liberal government's ability to be effective at managing relations with provincial governments Just over half of Canadians say the new Liberal government will be somewhat not effective (29%) or not effective (25%) at managing relations with provincial governments, while just over four in ten think they are effective (five per cent) and somewhat effective (37%). Four per cent are unsure. People living in the Prairies are most likely to think that the government will be not effective (40%) or somewhat not effective (31%).

SUMMARY

Canadians most likely to say new government will be effective or somewhat effective at investing in priorities Canadians care about

• Canadians are more likely to say the new Liberal government will not be effective rather than be effective at managing government spending — Nearly six in ten Canadians say that the new Liberal government will be not effective (39%) or somewhat not effective (21%) at managing government spending, while eight per cent say it will be effective and 30 per cent say somewhat effective. Three per cent are unsure. People living in the Prairies are most likely to think that the government will be not effective (58%) or somewhat not effective (16%).

These observations are based on an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,017 Canadians, 18 years of age or older, conducted between October 27th and 30th, 2019 as part of an omnibus survey. The margin of error for this survey is ±3.1 percentage points, 19 times out of 20.

This study was commissioned by CTV News and the research was conducted by Nanos Research.

MANIOC DECEADO

Top priority for the new Liberal government

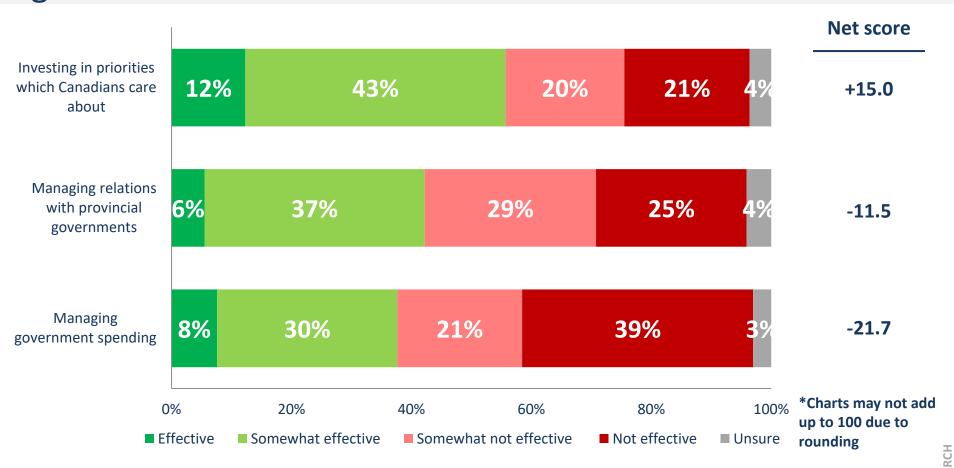

Top mentions	Frequency (n=1017)
The environment/climate change/renewable energy	23.9%
Economy	12.8%
Country unity/reconciliation	10.4%
Pipeline	9.8%
Healthcare	6.7%
Unsure	2.7%

METHODOLOGY

METHODOLOGY

Nanos conducted an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,017 Canadians, 18 years of age or older, between October 27th and 30th, 2019 as part of an omnibus survey. Participants were randomly recruited by telephone using live agents and administered a survey online. The sample included both land- and cell-lines across Canada. The results were statistically checked and weighted by age and gender using the latest Census information and the sample is geographically stratified to be representative of Canada.

Individuals randomly called using random digit dialling with a maximum of five call backs.

The margin of error for this survey is ± 3.1 percentage points, 19 times out of 20.

This study was commissioned by CTV News and the research was conducted by Nanos Research.

Note: Charts may not add up to 100 due to rounding.

TECHNICAL NOTE

Element	Description	Element	Description					
Research sponsor	CTV News		The results were weighted by age and gender using the latest Census information (2016) and the sample is geographically					
Population and Final Sample Size	1,017 Randomly selected individuals.	Weighting of Data	stratified to ensure a distribution across all regions of Canada. See tables for full weighting disclosure					
Source of Sample	Dynata		Screening ensured potential respondents did not work in the market research industry, in the advertising industry, in the					
Type of Sample	Probability	Screening	media or a political party prior to administering the survey to ensure the integrity of the data.					
Margin of Error	± 3.1 percentage points, 19 times out of 20.	Evelved and	Individuals younger than 18 years old; individuals without land or					
Mode of Survey	RDD dual frame (land- and cell-lines) hybrid telephone and online omnibus survey	Excluded Demographics	cell lines, and individuals without internet access could not participate.					
Sampling Method Base	The sample included both land- and cell-lines RDD (Random Digit Dialed) across Canada.	Stratification	By age and gender using the latest Census information (2016) and the sample is geographically stratified to be representative of Canada. Smaller areas such as Atlantic Canada were marginally					
Demographics (Captured)	Atlantic Canada, Quebec, Ontario, Prairies, British Columbia; Men and Women; 18 years and older. Six digit postal code was used to validate geography.	Estimated Response Rate	oversampled to allow for a minimum regional sample. 12 percent, consistent with industry norms.					
Fieldwork/Validation	Individuals were recruited using live interviews with live supervision to validate work, the research questions were administered online	Question Order	Question order in the preceding report reflects the order in which they appeared in the original questionnaire.					
Number of Calls	Maximum of five call backs.		This was module one of an omnibus survey. Previous content					
Time of Calls	Individuals were called between 12-5:30 pm and 6:30-9:30pm local time for the respondent.	Question Content	included unprompted national issues of concern and national ballot preferences.					
Field Dates	October 27 th to 30 th , 2019.	Question Wording	The questions in the preceding report are written exactly as they were asked to individuals.					
Language of Survey	The survey was conducted in both English and French.	Research/Data Collection Supplier	Nanos Research
