A very strong majority of Ontarians say improving the healthcare system to be prepared for future crises and improving the safety and health of long-term care residents should be an important priority for the provincial government after COVID-19

2020-1661 OPSEU | Summary

Conducted by Nanos for the Ontario Public Service Employees Union, June 2020 Submission 2020-1661

Most Ontarians say improving the healthcare system to be prepared for future crises and improving the safety and health of long-term care residents should be an important priority for the provincial government after COVID-19

A strong majority of Ontarians say it should be an important priority for the provincial government after COVID-19 to improve the healthcare system (78%) and improve the safety of long –term care residents (88%).

Ontarians have the strongest support for raising personal income taxes on the wealthy and raising corporate taxes to reduce the provincial deficit post-COVID-19

A majority of Ontarians support (42%) or somewhat support (34%) the provincial government raising corporate taxes to reduce the deficit once the COVID-19 crisis is resolved and support (55%) or somewhat support (26%) the provincial government raising personal income taxes on the wealthy

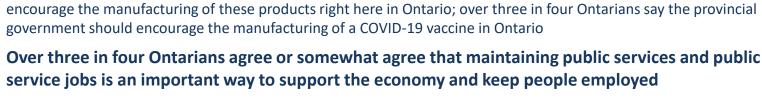

Over seven in ten Ontarians would oppose or somewhat oppose the provincial government cutting public services if it focused on reducing the deficit post-COVID-19

A majority of Ontarians would oppose (50%) or somewhat oppose (22%) the provincial government cutting public services such as social services, job training, enforcement of regulations, etc. to reduce the deficit

A strong majority of Ontarians agree that the provincial government should encourage the manufacturing of 'essential' products in Ontario; a majority say they should focus on manufacturing a COVID-19 vaccine

More than nine in ten Ontarians agree (75%) or somewhat agree (21%) that the provincial government should

100

A majority of Ontarians agree (44%) or somewhat agree (32%) that maintaining our public services and public service jobs at current levels is an important way to support the economy and keep people employed

Two in three
Ontarians say they
provincial
government should
end isolation
gradually as long as
the rate of new
infections is going
down

Nanos Research was retained by the Ontario Public Service Employees Union (OPSEU) to conduct research among Ontarians on the priorities for the provincial government after COVID-19, support for ways to reduce the deficit and preparations for future crises. To follow is a summary of the findings.

Priorities for the Ontario government

A strong majority of Ontarians say improving the health care system to ensure it is better prepared for a future crisis, improving the safety and health of residents of long-term care facilities, and creating jobs should be important or somewhat important priorities for the Ontario government when the COVID-19 crisis is resolved.

- Two in three Ontarians say they provincial government should end isolation gradually as long as the rate of new infections is going down Asked how they think the Ontario government should proceed now that more businesses are allowed to reopen and more activities are permitted, two in three Ontarians (66%) say the provincial government should end isolation gradually and in stages only as long as the rate of new infections is going down, while 20 per cent say keep current isolation measures in force until there is clear data to show that the threat of widespread infection is over. Ten per cent say the government should end remaining isolation measures quickly to allow all businesses to open and Ontarians to travel within the province and three per cent say go back to stricter social isolation measures until there is a vaccine. One per cent are unsure. Women are more likely to say isolation should end gradually (71%) than men (60%).
- More than six in ten Ontarians say reducing the deficit should be an important or somewhat important priority for the provincial government when the COVID-19 crisis is resolved A majority of Ontarians say reducing the deficit should be an important (29%) or somewhat important (35%) priority for the provincial government when the COVID-19 crisis is resolved, while over one in three say this should be somewhat not important (22%) or not important (13%). Two per cent are unsure. Residents of Southwestern Ontario give this a higher intensity of importance (40% important) than residents of the City of Toronto (24% important), while men give a higher intensity of importance (35% important) than women (25% important).

More than nine in ten Ontarians say creating jobs should be an important or somewhat important priority for the provincial government when the COVID-19 crisis is resolved

- Most Ontarians say improving the health care system so it is better prepared for future crises should be an important or somewhat important priority for the provincial government when the COVID-19 crisis is resolved A very strong majority of Ontarians say improving the health care system so it is better prepared for a future crisis should be an important (78%) or somewhat important (18%) priority for the provincial government when the COVID-19 crisis is resolved, while two per cent say this should be somewhat not important and one per cent say not important. One per cent are unsure. Women give this a higher intensity of importance (85% important) than men (71% important), and older Ontarians give this a higher intensity of importance (60 plus: 84%) than younger Ontarians (18-29: 65%).
- A very strong majority of Ontarians say improving the safety and health of long-term care facilities should be an important or somewhat important priority for the provincial government when the COVID-19 crisis is resolved Nearly all Ontarians say improving the safety and health of residents of long-term care facilities should be an important (88%) or somewhat important (10%) priority for the provincial government when the COVID-19 crisis is resolved, while one per cent each say this should be somewhat not important or not important. Older Ontarians give this a higher intensity of importance (60 plus: 93%; 50-59: 92%; 40-49: 91%) than younger Ontarians (18-29: 77%).
- More than nine in ten Ontarians say creating jobs should be an important or somewhat important priority for the provincial government when the COVID-19 crisis is resolved A strong majority of Ontarians say creating jobs should be an important (56%) or somewhat important (35%) priority for the provincial government when the COVID-19 crisis is resolved, while six per cent say this should be somewhat not important and three per cent should be not important. One per cent are unsure.
- Nearly eight in ten Ontarians say improving public services should be an important or somewhat important priority for the provincial government when the COVID-19 crisis is resolved A majority of Ontarians say improving public services should be an important (40%) or somewhat important (39%) priority for the provincial government when the COVID-19 crisis is resolved, while two in ten say this should be somewhat not important (15%) or not important (five per cent). One per cent are unsure. Residents of the GTA (47% important) and the City of Toronto (41%) give this a higher intensity of importance that other regions, and women give this a higher intensity of importance (47% important) than men (33%).

A strong majority of Ontarians would support or somewhat support the provincial government raising personal income taxes on the wealthy if it focused on reducing the deficit post-COVID-19

Support for ways to reduce the deficit after COVID-19

Ontarians had the strongest support for raising personal income taxes on the wealthy and raising corporate taxes and generally oppose or somewhat oppose raising personal income taxes, cutting public services, cutting public service jobs, cutting public service employee salaries, and privatizing Crown Corporations as options to reduce the deficit after COVID-19.

- More than three in four Ontarians would support or somewhat support the provincial government raising corporate taxes if it focused on reducing the deficit post-COVID-19 A majority of Ontarians support (42%) or somewhat support (34%) the provincial government raising corporate taxes to reduce the deficit once the COVID-19 crisis is resolved, while just over two in ten somewhat oppose (14%) or oppose (eight per cent) this. Two per cent are unsure. Women have a higher intensity of support for this (47% support) than men (37% support).
- A strong majority of Ontarians would support or somewhat support the provincial government raising personal income taxes on the wealthy if it focused on reducing the deficit post-COVID-19 More than eight in ten Ontarians support (55%) or somewhat support (26%) the provincial government raising personal income taxes on the wealthy to reduce the deficit once the COVID-19 crisis is resolved, while just under two in ten somewhat oppose (10%) or oppose (eight per cent) this. One per cent are unsure. Residents of Southwestern Ontario have a lower intensity of support for this (47%) compared to other regions.
- Two in three Ontarians would oppose or somewhat oppose the provincial government raising personal income taxes on everyone if it focused on reducing the deficit post-COVID-19 A majority of Ontarians would oppose (40%) or somewhat oppose (26%) the provincial government raising personal income taxes on everyone to reduce the deficit once the COVID-19 crisis is resolved, while just over three in ten somewhat support (23%) or support this (nine per cent). Two per cent are unsure.

Just under six in ten
Ontarians would
oppose or somewhat
oppose the provincial
government
privatizing Crown
Corporations such as
the LCBO if it focused
on reducing the
deficit post-COVID-19

- Ontarians more often say they would support or somewhat support the provincial government increasing the provincial portion of HST by 1% if it focused on reducing the deficit post-COVID-19 Over half of Ontarians would support (24%) or somewhat support (30%) the provincial government increasing the provincial portion of the HST by 1% to reduce the deficit once the COVID-19 crisis is resolved, while just over four in ten somewhat oppose (14%) or oppose this (29%). Two per cent are unsure.
- Over seven in ten Ontarians would oppose or somewhat oppose the provincial government cutting public services if it focused on reducing the deficit post-COVID-19 A majority of Ontarians would oppose (50%) or somewhat oppose (22%) the provincial government cutting public services such as social services, job training, enforcement of regulations, etc. to reduce the deficit once the COVID-19 crisis is resolved, while one in four somewhat support (17%) or support this (eight per cent). Two per cent are unsure. Women have a stronger intensity of opposition to this (56% oppose) than men (44% oppose).
- Just under six in ten Ontarians would oppose or somewhat oppose the provincial government cutting public service jobs if it focused on reducing the deficit post-COVID-19 A majority of Ontarians would oppose (35%) or somewhat oppose (23%) the provincial government cutting public service jobs to reduce the deficit once the COVID-19 crisis is resolved, while nearly four in ten somewhat support (22%) or support this (16%). Three per cent are unsure. Women have a stronger intensity of opposition to this (42% oppose) than men (28% oppose).
- More than half of Ontarians would oppose or somewhat oppose the provincial government cutting public service employee salaries if it focused on reducing the deficit post-COVID-19 A majority of Ontarians would oppose (34%) or somewhat oppose (22%) the provincial government cutting public service employee salaries to reduce the deficit once the COVID-19 crisis is resolved, while just over four in ten somewhat support (23%) or support this (18%). Three per cent are unsure.

Ontarians more often say if the provincial government decides to cut public service jobs to reduce the deficit they should cut management staff first

- Ontarians are divided over their support for the provincial government increasing user fees for things like licenses and permits if it focused on reducing the deficit post-COVID-19 Just over half of Ontarians would support (15%) or somewhat support (38%) the provincial government increasing user fees for things such as licenses, permits, provincial parks, etc. to reduce the deficit once the COVID-19 crisis is resolved, while over four in ten somewhat oppose (20%) or oppose this (24%). Two per cent are unsure.
- Just under six in ten Ontarians would oppose or somewhat oppose the provincial government privatizing Crown Corporations such as the LCBO if it focused on reducing the deficit post-COVID-19 A majority of Ontarians would oppose (43%) or somewhat oppose (16%) the provincial government privatizing Crown Corporations such as the LCBO to reduce the deficit once the COVID-19 crisis is resolved, while more than one in three somewhat support (16%) or support this (20%). Five per cent are unsure.
- Ontarians more often say if the provincial government decides to cut public service jobs to reduce the deficit they should cut management staff first Asked which jobs the provincial government should cut first if it decided to reduce the deficit by cutting public service jobs, Ontarians most often mention management staff (42%), followed by none of the above (29%), LCBO employees (12%), support and administrative staff (nine per cent), educational workers including college and university professors (six per cent), and Service Ontario workers (two per cent). No Ontarians selected health care workers.
- Ontarians more frequently rank health care as the public service that matters the most to them Asked to rank the top three public services that mean the most to them, Ontarians most often rank health care first (45%), followed by protecting the vulnerable (e.g. seniors, homeless)(13%), education (13%), creating jobs (11%), maintaining public safety (nine per cent), road infrastructure (three per cent), taxation (two per cent), and public transit (two per cent).

More than half of Ontarians more often say online services should be expanded after the COVID-19 crisis has ended

COVID-19 and the provincial government

A strong majority of Ontarians agree that the provincial government should encourage the manufacturing of essential products in Ontario, and three in four say the government should specifically encourage the manufacturing of a COVID-19 vaccine when available. Ontarians more often say the lack of COVID-19 testing is the fault of the provincial government, followed by the federal government.

- Ontarians more often say the lack of COVID-19 testing is the fault of the provincial government Asked who is at fault for the lack of COVID-19 testing, Ontarians more often say the provincial government (49%), followed by the federal government (42%), private, for-profit medical testing facilities (18%), public health doctors (15%), pharmaceutical companies (13%), public non-profit medical testing facilities (13%), hoarders (six per cent), and hospitals (six per cent). Two per cent say no one, while one per cent say all of the above and 27 per cent are unsure.
- Ontarians more often say online services should be expanded after the COVID-19 crisis has ended Asked what should happen to online public services government have made available during the COVID-19 crisis such as renewing driver's licenses and submitting court documents once the COVID-19 crisis has ended, Ontarians most often say online services should be expanded (55%), while 33 per cent say online services should be kept and nine per cent say it should go back to the way it was before. Three per cent are unsure.
- A very strong majority of Ontarians agree or somewhat agree that the provincial government should encourage the manufacturing of 'essential' products in Ontario More than nine in ten Ontarians agree (75%) or somewhat agree (21%) that in light of shortages of health products such as masks and hand sanitizer the provincial government should encourage the manufacturing of these products right here in Ontario, while three per cent somewhat disagree and one per cent disagree. One per cent are unsure.

More than three in four Ontarians say the provincial government should encourage the manufacturing of a COVID-19 vaccine in Ontario

- More than three in four Ontarians say the provincial government should encourage the manufacturing of a COVID-19 vaccine in Ontario Asked what products they think the provincial government should encourage the manufacturing of in Ontario, Ontarians most often select COVID-19 vaccine when available (76%), followed by medical safety equipment such as face masks (18%), food (16%), medical equipment such as ventilators (14%), prescription drugs (13%), cars and trucks (seven per cent), and toilet paper (four per cent).
- Ontarians more often rank making more frequent inspections, requiring more staff and holding a public inquiry as the most important actions the Ontario government should take in terms of privately-owned long term care facilities Asked to rank the importance of actions for the Ontario government to take in light of the high number of COVID-19 deaths in privately-owned long term care facilities compared to public long-term care facilities, Ontarians most often rank making more frequent inspections first (27%), followed by require higher levels of staffing (26%), hold a public inquiry (25%), and return privately owned long term care homes to public control (21%). One per cent say the provincial government should do nothing, and one per cent are unsure.

Impressions of workers during COVID-19

A majority of Ontarians say their impressions of grocery store and drug store employees and healthcare workers are better since the COVID-19 crisis started. They generally have the same impression of LCBO workers, corrections officers, public service workers and courtroom staff.

- More than two in three Ontarians say they have a better impression of healthcare workers since the COVID-19 crisis started Asked how their impression of healthcare workers has changed since the COVID-19 crisis started, over two in three Ontarians (68%) say their impression is better, while 29 per cent say their impression is the same and two per cent say their impression is worse. Two per cent are unsure. Ontarians 60 plus were more likely to say they have a better impression (75%) than Ontarians 18-29 (53%).
- A majority of Ontarians say they have the same impression of LCBO workers since the COVID-19 crisis started Asked how their impression of LCBO workers has changed since the COVID-19 crisis started, nearly seven in ten Ontarians (69%) say their impression is the same, while 14 per cent say their impression is better and four per cent say their impression is worse. Fourteen per cent are unsure.

Nearly seven in ten Ontarians say they have a better impression of grocery and drug store workers since the COVID-19 crisis started

- Ontarians more often say they have the same impression of corrections officers since the COVID-19 crisis started Asked how their impression of corrections officers has changed since the COVID-19 crisis started, nearly six in ten Ontarians (58%) say their impression is the same, while 10 per cent say their impression is better and four per cent say their impression is worse. Twenty-eight per cent are unsure.
- Nearly seven in ten Ontarians say they have a better impression of grocery and drug store workers since the COVID-19 crisis started Asked how their impression of grocery and drug store workers has changed since the COVID-19 crisis started, a majority of Ontarians (69%) say their impression is better, while 28 per cent say their impression is the same and two per cent say their impression is worse.
- Ontarians more often say they have the same impression of public service workers since the COVID-19 crisis started – Asked how their impression of public service workers has changed since the COVID-19 crisis started, more than one in two Ontarians (55%) say their impression is the same, while 28 per cent say their impression is better and 10 per cent say their impression is worse. Eight per cent are unsure.
- Ontarians are more likely to say they have a better impression of ambulance paramedics since the COVID-19 crisis started Asked how their impression of ambulance paramedics has changed since the COVID-19 crisis started, just under one in two Ontarians (48%) say their impression is better, while 43 per cent say their impression is the same and one per cent say their impression is worse. Eight per cent are unsure.
- Ontarians more often say they have the same impression of courtroom staff since the COVID-19 crisis started Asked how their impression of courtroom staff has changed since the COVID-19 crisis started, more than one in two Ontarians (53%) say their impression is the same, while three per cent say their impression is better and four per cent say their impression is worse. Thirty-nine per cent are unsure.

Over three in four Ontarians agree or somewhat agree that maintaining public services and public service jobs is an important way to support the economy and keep people employed

Improving the economy

A majority of Ontarians agree or somewhat agree that maintaining public services and public service jobs is important to the economy and that the province should increase spending on public services that help get people back to work. A majority of Ontarians also agree or somewhat agree that CERB payments should be extended until employment levels return to normal.

- Over three in four Ontarians agree or somewhat agree that maintaining public services and public service jobs is an important way to support the economy and keep people employed A majority of Ontarians agree (44%) or somewhat agree (32%) that maintaining our public services and public service jobs at current levels is an important way to support the economy and keep people employed, while over two in ten somewhat disagree (12%) or disagree (10%). Two per cent are unsure.
- A majority of Ontarians agree or somewhat agree that the province should increase spending on public services that help people get back to work Nearly three in four Ontarians agree (41%) or somewhat agree (33%) that we should increase spending on public services that help people get back to work, such as child care and public transit, while over two in ten somewhat disagree (13%) or disagree (nine per cent). Five per cent are unsure. Residents of Eastern Ontario had a lower intensity of agreement (29% agree) than residents of the City of Toronto (49%), Golden Horseshoe West (44% agree) and Central and Northern Ontario (43%).
- Over two in three Ontarians agree or somewhat agree that the Canada Emergency Response Benefit payments should be extended until employment levels get back to normal A majority of Ontarians agree (32%) or somewhat agree (36%) that the Canada Emergency Response Benefit payments to individuals should be extended beyond the current four-month period until employment levels get back to normal, while more than one in four somewhat disagree (14%) or disagree (13%). Four per cent are unsure.

Just over seven in ten Ontarians say the current Ontario government is moving in the right direction

Performance of the Ontario government

A majority of Ontarians say the current provincial government is moving in the right direction, and often mention being prepared and planning ahead as a lesson they should learn from the COVID-19 crisis.

- Ontarians more frequently mention being prepared and planning ahead as a lesson the Ontario government should learn from the COVID-19 crisis Asked what lessons the Ontario government should learn from the COVID-19 crisis, Ontarians more frequently mentioned being prepared/plan ahead (35%), followed by listen to scientists/medical professionals (10%), funding and attention to long-term care/better care for seniors (nine per cent), political accountability on decisions (nine per cent), manufacture PPE/medical supplies in Ontario (six per cent), and create new economic model (six per cent).
- Just over seven in ten Ontarians say the current Ontario government is moving in the right direction Seventy-one per cent of Ontarians say the current Ontario government led by Premier Doug Ford is moving in the right direction, while 13 per cent say it is moving in the wrong direction. Sixteen per cent are unsure. Residents of Southwestern Ontario are more likely to say the government is moving in the right direction (80%) than residents of the City of Toronto (63%), and residents 60 plus are more likely to say this (78%) than residents 18 to 29 (60%).

Nanos conducted an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,017 Ontarians, 18 years of age or older, between May 24^{th} and May 27^{th} , 2020 as part of an omnibus survey. Participants were randomly recruited by telephone using live agents and administered a survey online. The margin of error for this survey is ± 3.1 percentage points, 19 times out of 20.

The research was commissioned by the Ontario Public Service Employees Union and was conducted by Nanos Research.

Priorities for the Ontario government

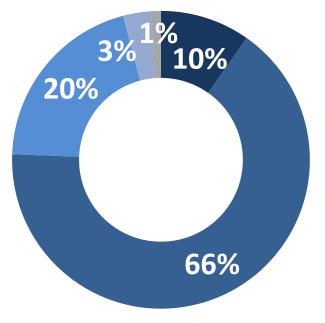

Most frequently Ontarians feel improving the safety of long-term care residents should be an important priority post-COVID-19.

End

■ End remaining isolation measures quickly to allow all businesses to open and Ontarians to
travel within the province

■ End isolation gradually and in stages only as long as the rate of new infections is going down

■ Keep current isolation measures in force until there is clear data to show that the threat of widespread infection is over, or a vaccine is found

■ Go back to stricter social isolation measures until there is a vaccine

METHODOLOGY

METHODOLOGY

Nanos conducted an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,017 Ontarians, 18 years of age or older, between May 24th and May 27th, 2020 as part of an omnibus survey. Participants were randomly recruited by telephone using live agents and administered a survey online. The results were statistically checked and weighted by age and gender using the latest Census information and the sample is geographically stratified to be representative of Ontario.

Individuals were randomly called using random digit dialling with a maximum of five call backs.

The margin of error for this survey is ± 3.1 percentage points, 19 times out of 20.

The research was commissioned by the Ontario Public Service Employees Union and was conducted by Nanos Research.

Note: Charts may not add up to 100 due to rounding.

Research sponsor	Ontario Public Service Employees Union		The results were weighted by age and gender using the latest Census information (2016) and the sample is geographically
Population and Final Sample Size	1017 Randomly selected individuals.	Weighting of Data	stratified to ensure a distribution across all regions of Ontario. See tables for full weighting disclosure
Source of Sample	Nanos Hybrid Probability Panel		Screening ensured potential respondents did not work in the market research industry, in the advertising industry, in the
Type of Sample	Probability	Screening	media or a political party prior* to administering the survey to ensure the integrity of the data. *Confirm if applicable
Margin of Error	± 3.1 percentage points, 19 times out of 20.		Individuals younger than 18 years old; individuals without land or
Mode of Survey	RDD dual frame (land- and cell-lines) hybrid telephone and online survey	Excluded Demographics	cell lines, and individuals without internet access could not participate.
Sampling Method Base	The sample included both land- and cell-lines RDD (Random Digit Dialed) across Ontario.	Stratification	By age and gender using the latest Census information (2016) and the sample is geographically stratified to be representative of Ontario.
Demographics (Captured)	Ontario; Men and Women; 18 years and older. Six digit postal code was used to validate geography.	Estimated	
(captarea)		Response Rate	14 percent, consistent with industry norms.
Fieldwork/Validation	Individuals were recruited using live interviews with live supervision to validate work, the research questions were administered online	Question Order	Question order in the preceding report reflects the order in which they appeared in the original questionnaire.
Number of Calls	Maximum of five call backs to those recruited.		
Time of Calls	Individuals recruited were called between 12-5:30 pm and 6:30-9:30pm local time for the respondent.	Question Content	All questions asked are contained in the report.
Field Dates	May 24 th to May 27 th , 2020.	Question Wording	The questions in the preceding report are written exactly as they were asked to individuals.
Language of Survey	The survey was conducted in both English and French.	Research/Data Collection Supplier	Nanos Research
Standards	Nanos Research is a member of the Canadian Research Insights Council (CRIC) and confirms that this research fully complies with all CRIC Standards including the CRIC Public Opinion Research Standards and Disclosure Requirements. https://canadianresearchinsightscouncil.ca/standards/	Contact	Contact Nanos Research for more information or with any concerns or questions. http://www.nanos.co Telephone:(613) 234-4666 ext. 237 Email: info@nanosresearch.com.

ABOUT NANOS

As one of North America's premier market and public opinion research firms, we put strategic intelligence into the hands of decision makers. The majority of our work is for private sector and public facing organizations and ranges from market studies, managing reputation through to leveraging data intelligence. Nanos Research offers a vertically integrated full service quantitative and qualitative research practice to attain the highest standards and the greatest control over the research process. www.nanos.co

nanos dimap analytika

dimap

This international joint venture between <u>dimap</u> and <u>Nanos</u> brings together top research and data experts from North American and Europe to deliver exceptional data intelligence to clients. The team offers data intelligence services ranging from demographic and sentiment microtargeting; consumer sentiment identification and decision conversion; and, data analytics and profiling for consumer persuasion. www.nanosdimap.com

NANOS RUTHERFORD McKAY & Co.

NRM is an affiliate of Nanos Research and Rutherford McKay Associates. Our service offerings are based on decades of professional experience and extensive research and include public acceptance and engagement, communications audits, and narrative development. www.nrmpublicaffairs.com
