

Close to one half of Ontario residents report they have delayed getting medical care for themselves or a loved one because they were afraid of being exposed to COVID; close to three in four have been anxious or somewhat anxious about being exposed to COVID-19 when visiting or considering visiting a clinic or hospital

2020-1681 | ON Survey | Summary

Conducted by Nanos for TelusHealth ON, July 2020
Submission 2020-1681

 **TELUS**[®] Health

 **NANOS**

Nearly three in four Ontario residents say they have been anxious or somewhat anxious about being exposed to COVID-19 when visiting or considering visiting a clinic or hospital

Just under one in two Ontario residents report they have delayed getting medical care for themselves or a loved one because they were afraid of being exposed to COVID, and a strong majority say they have been anxious or somewhat anxious about being exposed to COVID-19 when visiting a clinic or hospital. Over three in four residents agree or somewhat agree they are concerned a second wave of COVID could impact their ability to access medical care.

Close to three in five residents who needed medical care for themselves or a loved one report they or their loved one accessed care through a phone or video call with their family doctor. More than three in five are comfortable or somewhat comfortable having a virtual consultation, and a majority of residents who make healthcare decisions for someone other than themselves think the use of virtual care would make it easier or somewhat easier to help their loved ones consult with a doctor. Close to six in ten residents agree or somewhat agree that they are likely to use an Ontario Health Insurance virtual care service even once the pandemic is over.

Healthcare access and decision making

- **Six in ten residents of Ontario report they make healthcare decisions for someone other than themselves** – Just over four in ten Ontario residents report they do not make healthcare decisions for anyone other than themselves (45%), while 35 per cent report making healthcare decisions for their spouse/partner, and 25 per cent report making decisions for their child(ren). Ten per cent report making healthcare decisions for their parent(s), while three per cent report making these decisions for another family member, and one per cent are unsure/ prefer not to say. Residents 35 to 54 years of age are significantly more likely to report making healthcare decisions for a child (47%) than those 18 to 34 (eight per cent) or 55 plus (16%), while those 35 to 54 are more likely to report making healthcare decisions for their partner/spouse (42%) than younger residents (18-34: 25%).
- **A majority of Ontario residents report they currently have a family doctor** – Eighty-eight per cent of Ontario residents report they currently have a family doctor, while 11 per cent report they do not. This is consistent across region and age groups.

Over four in ten Ontario residents report they have needed to access non-emergency medical care for themselves or a loved one since March of this year

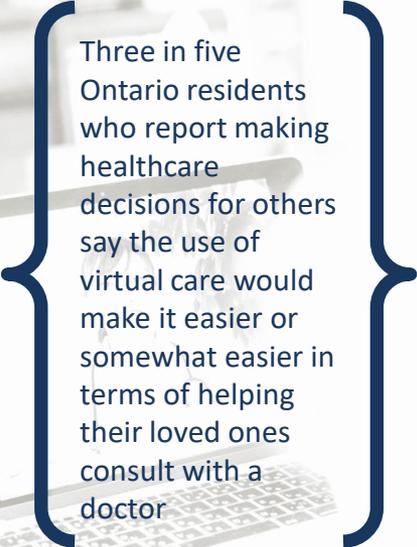

Accessing medical care since March

- **About three in four Ontario residents say they have been anxious or somewhat anxious about being exposed to COVID-19 when visiting a clinic or hospital** – A majority of Ontario residents say since March they have been anxious (29%) or somewhat anxious (47%) about being exposed to COVID-19 when visiting or considering visiting a clinic or hospital, while just under one in four say they have been somewhat not anxious (11%) or not anxious (12%). One per cent are unsure/prefer not to answer.
- **Under one in two Ontario residents report they have needed to access non-emergency medical care for themselves or a loved one since March of this year** – Over four in ten Ontario residents report they have needed to access non-emergency medical care for themselves (31%) or a loved one (15%), while 57 per cent report they have not needed to access non-emergency medical care. Two per cent are unsure/prefer not to answer.
- **Ontario residents who needed medical care for themselves more often report they needed medical care for a new, non-emergency and non-COVID related health concerns or prescription renewals** – More than one in two Ontario residents who report needing medical care for themselves since March say the care they needed was for a new, non-emergency and non-COVID related health concern (e.g. ear infection, skin condition, cold or flu symptoms or allergies)(55%), followed by prescription renewals (54%) questions or concerns regarding a chronic condition (e.g. diabetes, asthma, heart disease)(31%), mental health concerns (e.g. anxiety, depression)(18%), and COVID or COVID related concerns (11%).
- **Ontario residents who needed medical care for themselves more often report they accessed care through a phone or video call with their family doctor** – Over one in two Ontario residents who report needing medical care for themselves since March report they accessed medical care by way of a phone or video call with their family doctor (55%), followed by in-person at their doctor's office (31%), a virtual care service (i.e. a video chat with a local doctor other than your family doctor)(20%), Telehealth (12%), at a hospital emergency room (11%), at a walk-in clinic (11%), and an Ontario Health Insurance (OHIP) covered virtual care service offered by a third party (eight per cent). Eight per cent report they chose not to access medical care during the pandemic.

Just under one in two Ontario residents report they have delayed getting medical care for themselves or a loved one because they were afraid of being exposed to COVID

- **Ontario residents who needed to access medical care for a loved one more often report their loved one needed medical care for a new, non-emergency and non-COVID related health concerns** – Close to three in five Ontario residents who report needing medical care for a loved one since March each report the care their loved one needed was for a new, non-emergency and non-COVID related health concern (e.g. ear infection, skin condition, cold or flu symptoms or allergies)(58%), followed by prescription renewals (36%), questions or concerns regarding a chronic condition (e.g. diabetes, asthma, heart disease)(27%), mental health concerns (e.g. anxiety, depression)(six per cent), and COVID or COVID related concerns (four per cent).
- **Ontario residents who needed medical care for a loved one more often report their loved one accessed care through a phone or video call with their family doctor** – Just under three in five Ontario residents who report needing medical care for a loved one since March report their loved one accessed medical care by way of a phone or video call with their family doctor (58%), followed by in-person at their doctor’s office (27%), a hospital emergency room (15%), Telehealth (10%), a walk-in clinic (eight per cent), an Ontario Health Insurance (OHIP) covered virtual care service offered by a third party (six per cent), and a virtual care service offered through employee health benefits (two per cent). Eight per cent report their loved one chose not to access medical care during the pandemic.
- **Almost one half of Ontario residents report they have delayed getting medical care for themselves or a loved one because they were afraid of being exposed to COVID** – Fifty-four per cent of Ontario residents report they have not delayed getting medical care for themselves or a loved one because they were afraid of being exposed to COVID-19 in a clinic or hospital, while 40 per cent report they delayed care for themselves, and 10 per cent report they delayed care for someone else. One per cent are unsure/would prefer not to answer. Women are more likely to report delaying getting medical care for themselves (46%) than men (33%), as are residents 55 plus (45%; 35-54: 33%).
- **More than two in three Ontario residents who report delaying getting medical care due to COVID fears say they were concerned or somewhat concerned about their or their loved one’s medical condition getting worse** – A majority of Ontario residents who report they delayed getting medical for themselves or a loved one due to a fear of COVID exposure at a clinic or hospital say they were concerned (29%) or somewhat concerned (40%) about their or their loved one’s condition getting worse because they delayed medical care or advice. Three in ten say they were somewhat not concerned (16%) or not concerned (14%), while two per cent are unsure/would prefer not to say. Women are more likely to say they were concerned (35%) than men (19%).

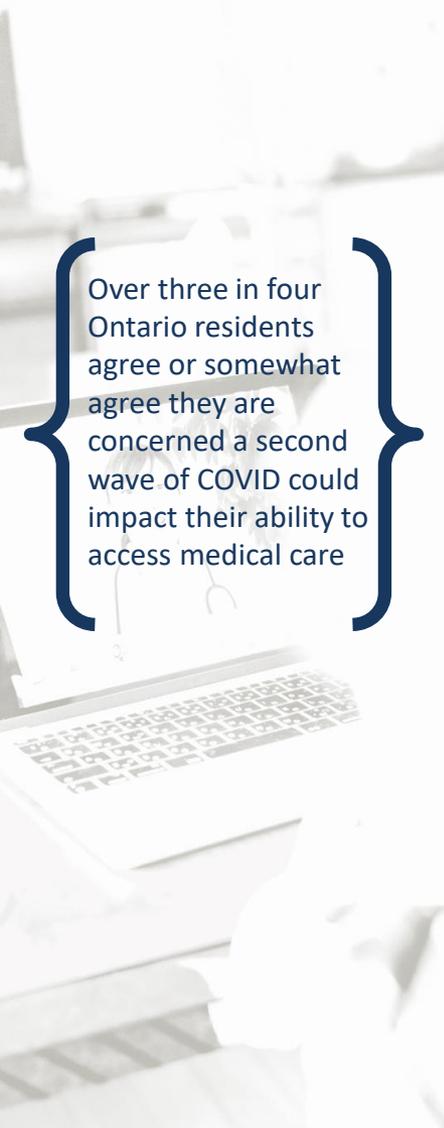

Three in five Ontario residents who report making healthcare decisions for others say the use of virtual care would make it easier or somewhat easier in terms of helping their loved ones consult with a doctor

Virtual Care

- **Ontario residents more often say they would prefer to have medical appointments in-person or by phone call given the option to consult with a doctor virtually** – Asked how they would prefer to have medical appointments given the option to consult with a doctor virtually, either their family doctor or another healthcare provider, 34 per cent say they would prefer to have appointments in-person. Thirty-two per cent say they would prefer a phone call, followed by a video chat (20%), no preference (eight per cent), secure chat/text messaging (three per cent), and two per cent are unsure. Older residents (55 plus) are more likely to say they would prefer an in-person appointment (44%; 35-54: 28%; 18-34: 27%), while younger residents are more likely to say they prefer a video chat (18-34: 30%; 35-54: 24%; 55 plus: 10%).
- **Three in five Ontario residents who report making healthcare decisions for others say the use of virtual care would make it easier or somewhat easier in terms of helping their loved ones consult with a doctor** – A majority of Ontario residents who report they make healthcare decisions for someone other than themselves say they think the use of virtual care would make it easier (21%) or somewhat easier (39%) when it comes to helping their loved ones consult with a doctor, while over one in four think this would make it somewhat difficult (18%) or difficult (10%). Five per cent say it makes no difference and six per cent say they don't know/would prefer not to say.
- **Ontario residents with a family doctor most often report their family doctor offers virtual consultations via a phone call** – Asked if their family doctor offers virtual consultations, over four in ten Ontario residents with a family doctor report their doctor offers virtual consultations via a phone call (43%), followed by no, they do not offer virtual consultations (16%), yes, via a video chat (12%), and yes, via secure chat/text messaging (five per cent). Thirty-two per cent say they don't know/would prefer not to answer.
- **Ontario residents without a family doctor most often report they do not use virtual care options** – Ontario residents who report they do not have a family doctor (n=54) most often report they do not use virtual care (66%), followed by yes, through Telehealth (19%), yes, virtual care service offered through employee health benefits (five per cent), and yes, through an Ontario Health Insurance (OHIP) covered virtual care service offered by a third party (five per cent). Seven per cent say they don't know/would prefer not to answer.

About two in three Ontario residents say they are comfortable or somewhat comfortable having a virtual consultation through an OHIP covered service offered by a third party

- **Close to two in three Ontario residents say they are comfortable or somewhat comfortable having a virtual consultation through an Ontario Health Insurance (OHIP) covered service offered by a third party** – A majority of Ontario residents say they are comfortable (23%) or somewhat comfortable (42%) having a virtual consultation through an Ontario Health Insurance (OHIP) covered service offered by a third party, while over one in four say they are somewhat not comfortable (16%) or not comfortable (12%). Eight per cent are unsure/would prefer not to answer. Those who report they needed medical care for themselves since March are more likely to say they are comfortable (36%) than those who report they did not need medical care for themselves or a loved one since March (16%).
- **Ontario residents who say they are somewhat uncomfortable or uncomfortable having a virtual consultation with a doctor more often cite they would prefer to see a doctor in person** – Asked why they are somewhat not comfortable or not comfortable with the idea of having a virtual consultation with a doctor through OHIP, Ontario residents more often say they would prefer to see a doctor in person (52%), followed by they don't want to see a doctor they don't already have a relationship with (44%), they are worried they wouldn't be able to diagnose them without being seen in person (42%), they have security concerns (e.g. data privacy)(31%), they don't trust it (21%), they think it would be expensive (14%), and they don't believe in private healthcare (13%).
- **Ontario residents are split on whether they agree or disagree that they feel nervous or unprepared for virtual care appointments** – Close to one in two Ontario residents somewhat disagree (21%) or disagree (25%) that they feel nervous or unprepared for virtual care appointments, while over four in ten somewhat agree (30%) or agree (14%) with this. Ten per cent are unsure/ would prefer not to answer. Residents of the City of Toronto are more likely to disagree with this (35%) than residents of the GTA/Golden Horseshoe (19%).
- **Two in three Ontario residents agree or somewhat agree they are interested in learning tips on how to use virtual care services** – A majority of Ontario residents agree (24%) or somewhat agree (42%) that they are interested in learning tips on how to use virtual care services, while one in four somewhat disagree (12%) or disagree (13%). Nine per cent are unsure/ would prefer not to answer. Residents of the GTA/Golden Horseshoe are more likely to agree with this (33%) than residents of the City of Toronto (16%) or the rest of Ontario (20%). Those who report they needed medical care for themselves since March are more likely to say agree (32%) than those who report they did not need medical care for themselves or a loved one since March (20%).

Over three in four Ontario residents agree or somewhat agree they are concerned a second wave of COVID could impact their ability to access medical care

- **More than three in four Ontario residents agree or somewhat agree they are concerned a second wave of COVID could impact their ability to access medical care** – A strong majority of Ontario residents agree (34%) or somewhat agree (43%) that they are concerned that a second wave of COVID-19 would impact their ability to access medical care, while under two in ten somewhat disagree (10%) or disagree (eight per cent). Five per cent are unsure/would prefer not to answer.
- **Close to six in ten Ontario residents agree or somewhat agree that they are likely to use an Ontario Health Insurance virtual care service even once the pandemic is over** – A majority of Ontario residents agree (19%) or somewhat agree (38%) that they are likely to use an Ontario Health Insurance (OHIP) covered virtual care service offered by a third party even once the COVID-19 pandemic is over, while close to one in three somewhat disagree (15%) or disagree (17%). Eleven per cent are unsure/would prefer not to answer. Those who report they needed medical care for themselves since March are more likely to agree (30%) than those who report they did not need medical care for themselves or a loved one since March (12%).
- **Ontario residents more often say they want to learn about how virtual care works**– Asked what aspects of virtual care they would like to learn more about, residents of Ontario more often say nothing (19%), followed closely by how it all works/all aspects (not specified)(16%), scheduling/access and types of services available (13%), privacy/security (10%), and the logistics (internet connection, platform required, etc.)(eight per cent).

Nanos conducted a representative online survey of 502 residents of Ontario, between July 8th to 10th, 2020 drawn from a non-probability panel. The results were statistically checked and weighted by age and gender using the latest Census information and the sample is geographically stratified to be representative of Ontario.

The research was commissioned by TelusHealth and was conducted by Nanos Research.

76% of Ontarians are **anxious** or **somewhat anxious** about being exposed to COVID-19 while visiting a clinic or hospital

47% of Ontarians report they have **delayed getting medical care** for themselves or a loved one due to COVID-19 fears

77%

of Ontarians **agree** or **somewhat agree** they are concerned a second wave of COVID-19 could impact their ability to access medical care

65% of Ontarians are **comfortable** or **somewhat comfortable** having a virtual care consultation covered by OHIP

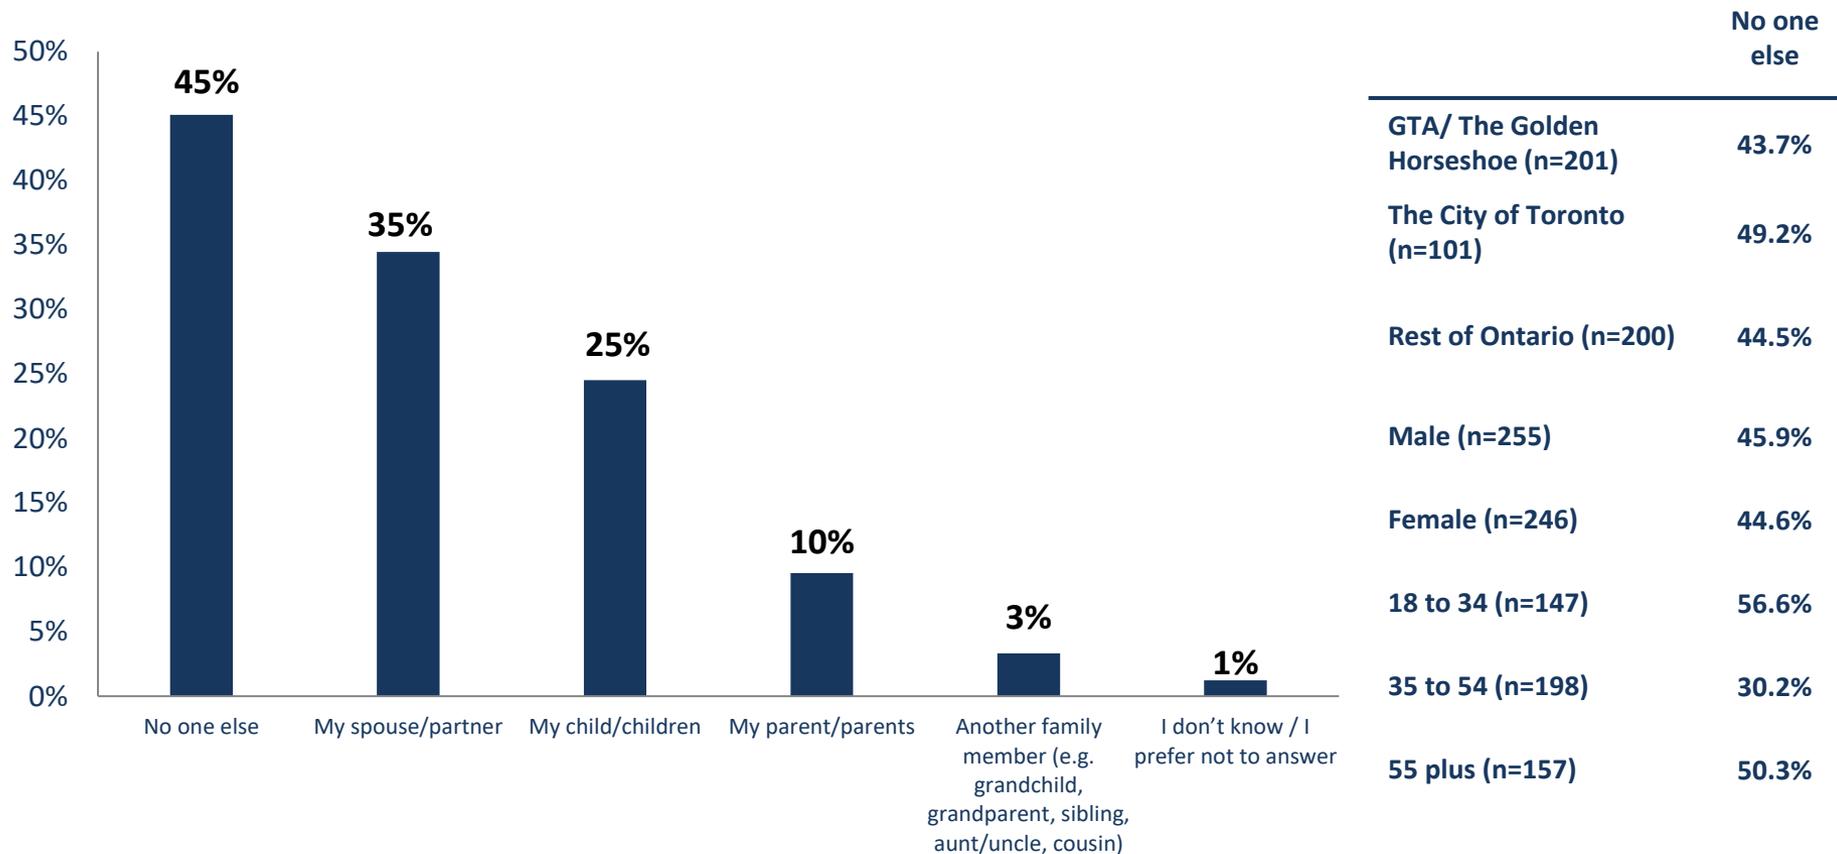

66% of Ontarians **agree** or **somewhat agree** they are interested in learning tips on how to use virtual care services

What they want to know about virtual care

- 16%** How these services work
- 13%** How to schedule appointments
- 11%** How assessments/diagnostics will work
- 10%** How these platforms manage privacy and security
- 8%** What technology is required

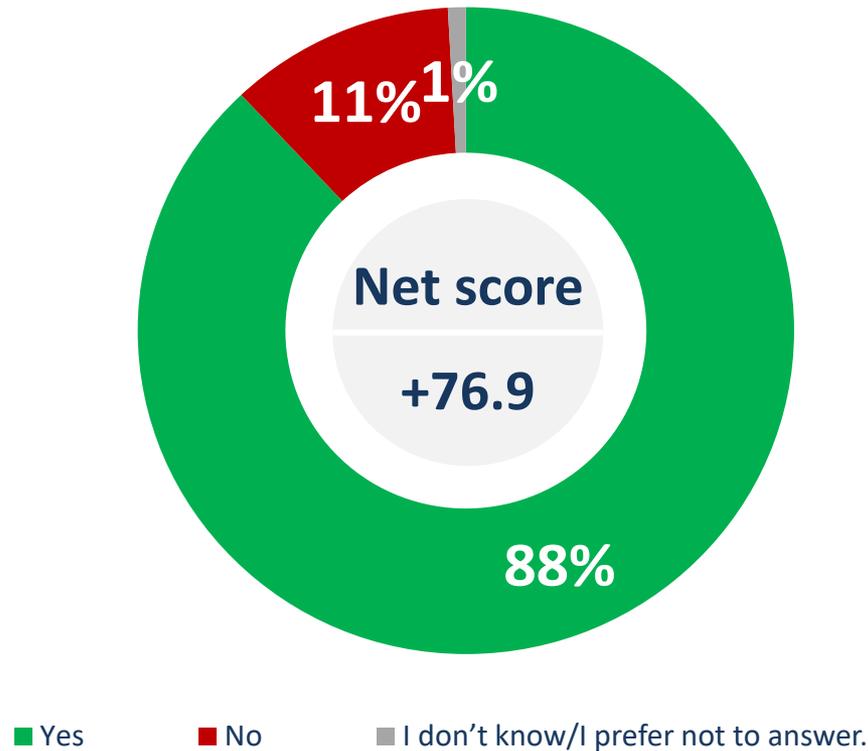

Making healthcare decisions

QUESTION – [ASK ALL] Other than yourself, who else do you make healthcare decisions for? Choose all that apply.

Having a family doctor

	Yes
GTA/ The Golden Horseshoe (n=201)	91.1%
The City of Toronto (n=101)	83.1%
Rest of Ontario (n=200)	87.5%
Male (n=255)	87.8%
Female (n=246)	88.1%
18 to 34 (n=147)	83.7%
35 to 54 (n=198)	88.6%
55 plus (n=157)	90.6%

*Weighted to the true population proportion.
*Charts may not add up to 100 due to rounding.

QUESTION – [ASK ALL] Do you currently have a family doctor?

Accessing medical care since March

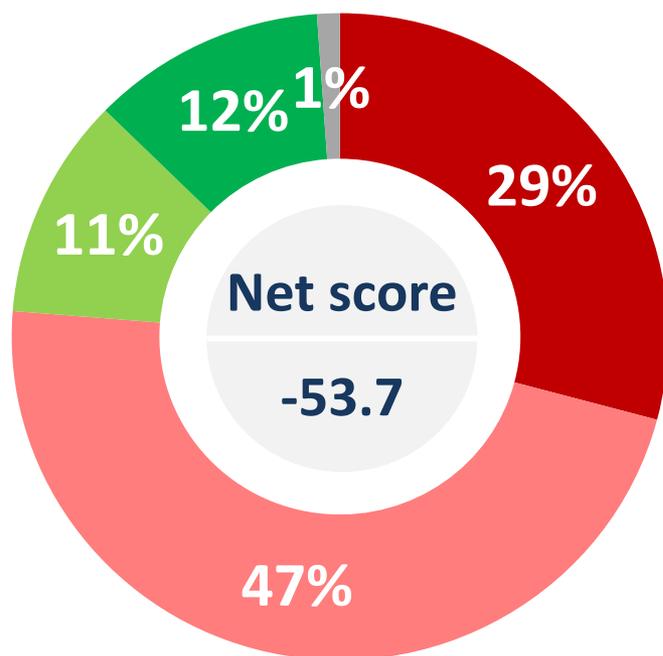

“

Three in four Ontarians are anxious or somewhat anxious about being exposed to COVID-19 when visiting a clinic or hospital.

”

Anxiety about being exposed to COVID-19 when visiting a clinic or hospital

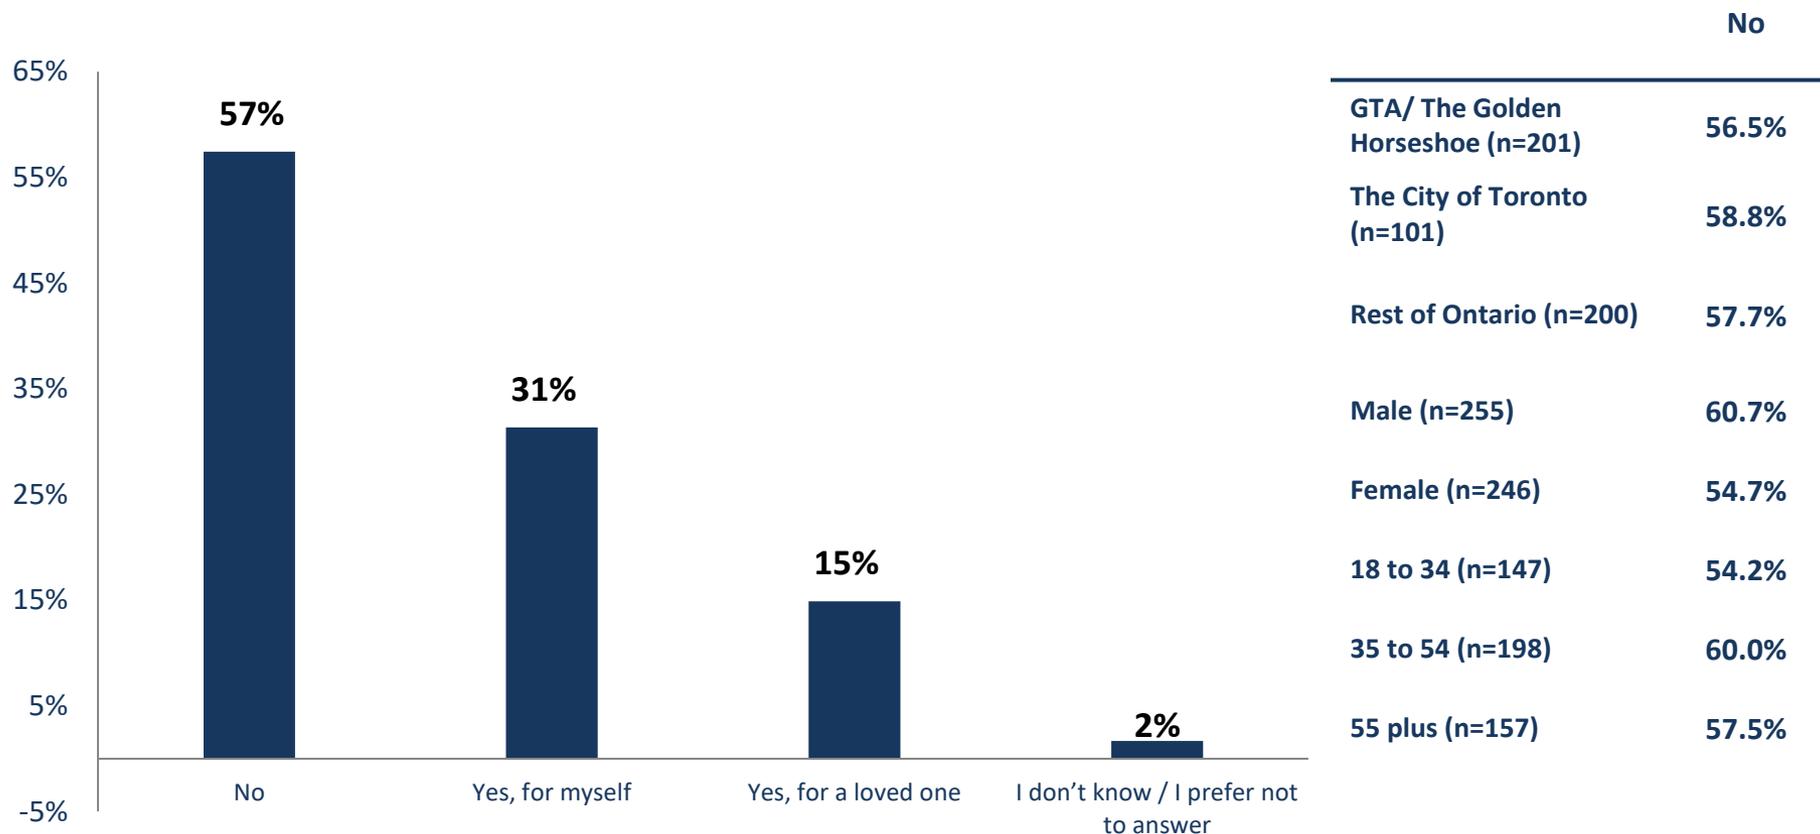

- Anxious
- Somewhat anxious
- Somewhat not anxious
- Not anxious
- I don't know/I prefer not to answer

	Anxious/ Somewhat anxious
GTA/ The Golden Horseshoe (n=201)	78.0%

*Weighted to the true population proportion.
*Charts may not add up to 100 due to rounding.

QUESTION – [ASK ALL] Are you comfortable, somewhat comfortable, somewhat uncomfortable or not comfortable having a virtual consultation through an Ontario Health Insurance (OHIP) covered service offered by a third party?

Reason for discomfort having a virtual consultation by region

	Frequency (n=131)	GTA/ The Golden Horseshoe (n=44)	The City of Toronto (n=26)*	Rest of Ontario (n=61)
I prefer to see a doctor in person	51.8%	56.0%		52.0%
I don't want to see a doctor I do not already have a relationship with	43.7%	48.2%		44.8%
I am worried they wouldn't be able to diagnose me without seeing me in person	41.5%	46.2%		41.1%
I have security concerns (e.g. data privacy)	30.9%	26.2%		34.3%
I do not trust it	20.6%	19.9%		23.4%
I think it would be expensive	14.4%	17.2%		14.4%
I don't believe in private healthcare	12.6%	15.2%		7.6%
I do not need it	8.2%	9.8%		6.6%
I am not comfortable enough with technology	7.2%	11.6%		7.2%
I am concerned about my home data usage	4.8%	6.3%		5.8%
I am concerned about my mobility data usage	3.2%	6.3%		2.3%
Other	1.6%	-		3.5%

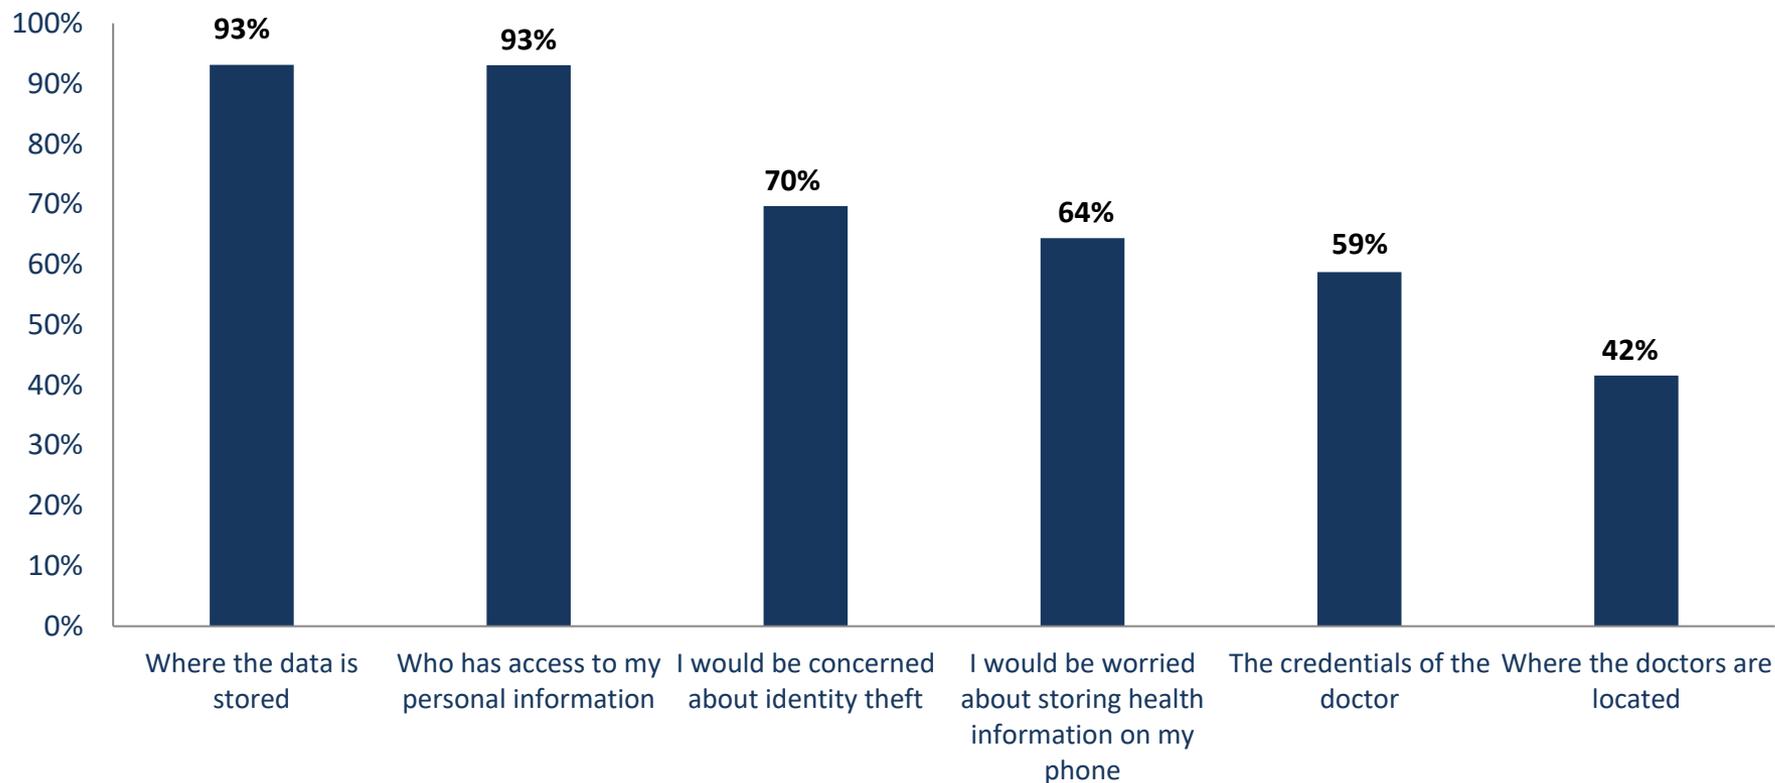

QUESTION – [ASK IF SOMEWHAT UNCOMFORTABLE/UNCOMFORTABLE] Why are you not comfortable with the idea of having a virtual consultation with a doctor through an Ontario Health Insurance (OHIP) covered service offered by a third party? Select all that apply. [RANDOMIZE]

Reason for discomfort having a virtual consultation by gender and age

	Frequency (n=131)	Male (n=58)	Female (n=72)	18 to 34 (n=28)*	35 to 54 (n=54)	55 plus (n=49)
I prefer to see a doctor in person	51.8%	57.3%	47.3%		42.7%	55.6%
I don't want to see a doctor I do not already have a relationship with	43.7%	42.8%	43.7%		42.3%	48.0%
I am worried they wouldn't be able to diagnose me without seeing me in person	41.5%	39.2%	42.3%		40.6%	39.6%
I have security concerns (e.g. data privacy)	30.9%	39.4%	25.4%		31.4%	28.0%
I do not trust it	20.6%	21.8%	18.7%		27.0%	14.1%
I think it would be expensive	14.4%	15.2%	12.8%		11.3%	13.7%
I don't believe in private healthcare	12.6%	15.3%	10.8%		13.7%	13.8%
I do not need it	8.2%	5.0%	10.5%		8.5%	7.6%
I am not comfortable enough with technology	7.2%	7.8%	6.9%		3.5%	13.5%
I am concerned about my home data usage	4.8%	8.0%	2.6%		3.5%	8.1%
I am concerned about my mobility data usage	3.2%	4.3%	1.1%		7.1%	-
Other	1.6%	-	2.8%		2.1%	1.9%

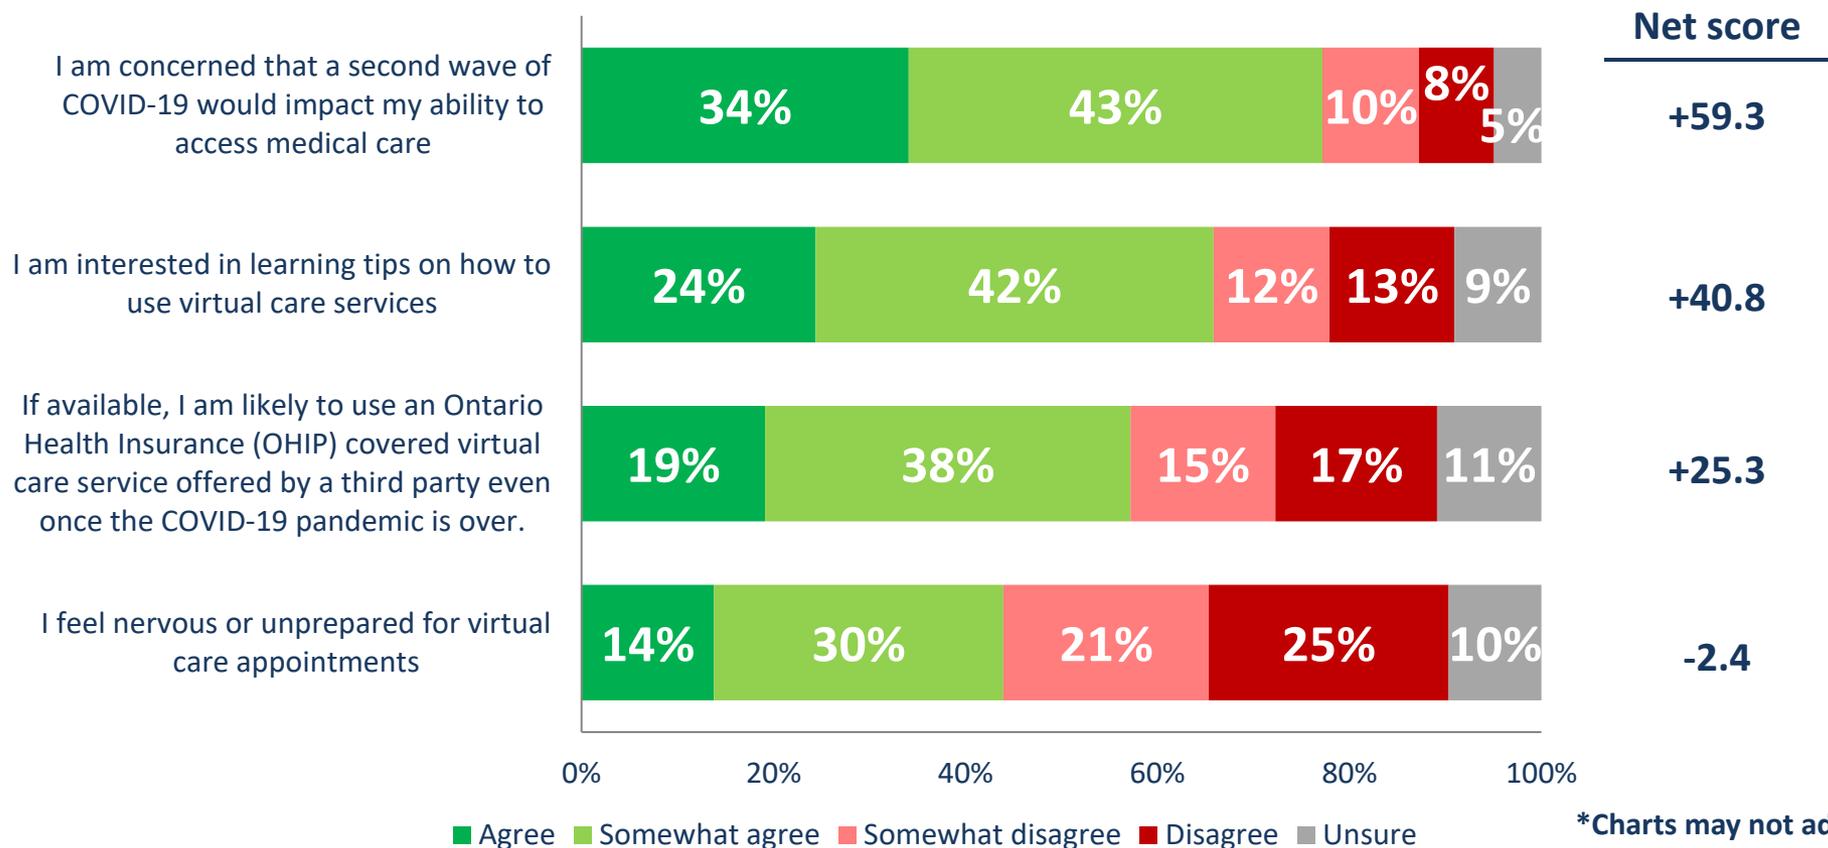

the idea of having a virtual consultation with a doctor through an Ontario Health Insurance (OHIP) covered service offered by a third party? Select all that apply. [RANDOMIZE]

Security concerns related to virtual consultation from a doctor

QUESTION – [ASK IF Q16 RESPONSE WAS SECURITY CONCERNS] What sort of security concerns do you have, if any, with the idea of seeing a doctor virtually using video calling on your smartphone? Select all that apply. [RANDOMIZE]

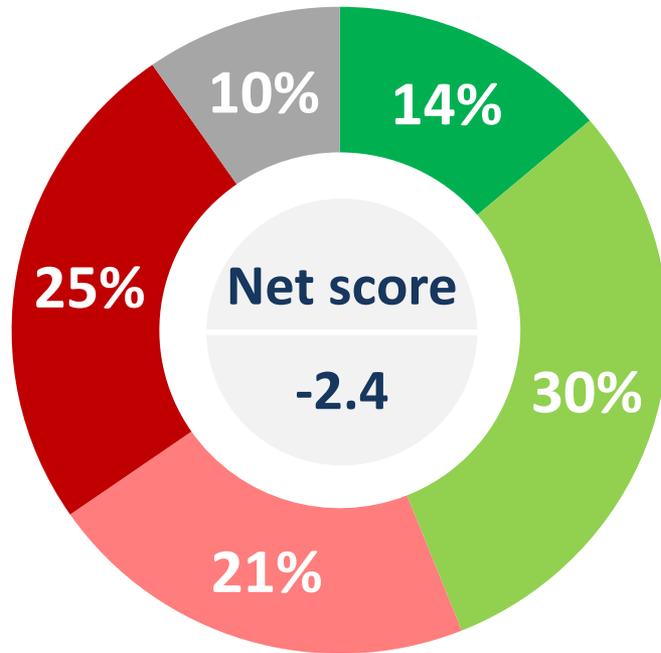

Views on virtual care services offered by a third party

*Charts may not add up to 100 due to rounding

QUESTION – [ASK ALL] Still thinking specifically of Ontario Health Insurance (OHIP) covered virtual care services offered by a third party (i.e. allows video / audio appointments with an Ontario licensed other than your family doctor), please tell us how much you agree or disagree with the following statements [RANDOMIZE]

Nervousness towards virtual care appointments

- Agree
- Somewhat agree
- Somewhat disagree
- Disagree
- I don't know/I prefer not to answer

	Disagree/ Somewhat disagree
GTA/ The Golden Horseshoe (n=201)	44.9%
The City of Toronto (n=100)	55.9%
Rest of Ontario (n=199)	43.0%
Male (n=253)	50.3%
Female (n=246)	43.0%
18 to 34 (n=147)	43.2%
35 to 54 (n=198)	54.5%
55 plus (n=155)	41.3%

*Weighted to the true population proportion.

QUESTION – [ASK ALL] Still thinking specifically of Ontario Health Insurance (OHIP) covered virtual care services offered by a third party (i.e. allows video / audio appointments with an Ontario licensed other than your family doctor), please tell us how much you agree or disagree with the following statements [RANDOMIZE]

If available, I am likely to use an Ontario Health Insurance (OHIP) covered virtual care service offered by a third party even once the COVID-19 pandemic is over.

Top Mentions	Frequency (n=410)
Nothing	18.9%
How it works/all aspects (not specified)	16.4%
Scheduling/access and types of services available	12.9%
How assessments/diagnostics will work	10.5%
Privacy/security	10.2%
The logistics (internet connection, platform required, etc.)	8.3%
Unsure	7.2%

QUESTION – [ASK ALL] What aspects of virtual care would you like to learn more about? [OPEN-ENDED]

Nanos conducted a representative online survey of 502 residents of Ontario between July 8th to 10th, 2020, drawn from a non-probability panel. The results were statistically checked and weighted by age and gender using the latest Census information and the sample is geographically stratified into three regions, the Greater Toronto Area (GTA)/ The Golden Horseshoe, the City of Toronto, and the rest of Ontario, to be representative of Ontario.

geographically stratified into three regions to be representative of Ontario.

The research was commissioned by TelusHealth and was conducted by Nanos Research.

Note: Charts may not add up to 100 due to rounding. *It is also important to note that some results have been shaded due to small sample size.

Element	Description
Research sponsor	TelusHealth
Population and Final Sample Size	502 residents of Ontario drawn from a panel
Source of Sample	Prodege
Type of Sample	Representative non-probability
Margin of Error	No margin of error applies to this research.
Mode of Survey	Online survey
Sampling Method Base	Non-probability.
Demographics (Captured)	Ontario residents; 18 years or older. Six digit postal code was used to validate geography.
Demographics (Other)	Age, gender, education, income
Field Dates	July 8 th to 10 th , 2020
Language of Survey	The survey was conducted in both English and French.
Standards	Nanos Research is a member of the Canadian Research Insights Council (CRIC) and confirms that this research fully complies with all CRIC Standards including the CRIC Public Opinion Research Standards and Disclosure Requirements. https://canadianresearchinsightscouncil.ca/standards/

Element	Description
Weighting of Data	The results were weighted by age and gender using the latest Census information (2016) and the sample is geographically stratified to ensure a distribution across all regions of Ontario. See tables for full weighting disclosure.
Screening	Screening ensured potential respondents did not work in the market research industry, in the advertising industry, in the media or a political party prior to administering the survey to ensure the integrity of the data.
Excluded Demographics	Individuals younger than 18 years old; individuals without internet access could not participate.
Stratification	By age and gender using the latest Census information (2016) and the sample is geographically stratified to be representative of the province of Ontario.
Estimated Response Rate	Not applicable.
Question Order	Question order in the preceding report reflects the order in which they appeared in the original questionnaire.
Question Content	All questions asked are contained in the report.
Question Wording	The questions in the preceding report are written exactly as they were asked to individuals.
Research/Data Collection Supplier	Nanos Research
Contact	Contact Nanos Research for more information or with any concerns or questions. http://www.nanos.co Telephone:(613) 234-4666 ext. 237 Email: info@nanosresearch.com.

As one of North America's premier market and public opinion research firms, we put strategic intelligence into the hands of decision makers. The majority of our work is for private sector and public facing organizations and ranges from market studies, managing reputation through to leveraging data intelligence. Nanos Research offers a vertically integrated full service quantitative and qualitative research practice to attain the highest standards and the greatest control over the research process.

	Don't know/prefer not to answer	%	6.9									

*Multifrequency question grouped by responses. Values are based on the proportion a virtual care option represents of all responses (columns add up to 100 percent).

Nanos conducted an online representative non-probability survey of 502 Ontario residents drawn from a panel, 18 years of age or older, between July 8th and July 10th, 2020. *Note that some results have been shaded due to small sample size.

2020-1681 – TelusHealth Ontario – STAT SHEET

For the next set of questions, we would like you to think specifically of Ontario Health Insurance Plan (OHIP) covered virtual care services offered by a third party (i.e. allows video appointments with a BC-licensed doctor other than your family doctor). This is different than having a telephone or video consultation with your own family doctor.

			Region				Gender			Age

For the next set of questions, we would like you to think specifically of Ontario Health Insurance Plan (OHIP) covered virtual care services offered by a third party (i.e. allows video appointments with a BC-licensed doctor other than your family doctor). This is different than having a telephone or video consultation with your own family doctor.

Other than yourself, who else do you make healthcare decisions for? Choose all that apply.
