

Over seven in ten Canadians support or somewhat support barring those who do not have proof of vaccination from businesses where people are in close contact.

Key Findings

Back to Normal

Residents from Quebec are more likely to agree (28%) that with vaccines now being distributed in Canada their life will get back to normal by the end of 2021 than residents from the Atlantic (19%) or Ontario (18%).

Vaccine Priority

Canadians ranked front line healthcare workers (72%) as the top priority group to receive the COVID-19 vaccine followed by seniors in long-term care homes (20%).

No Vaccine No Service

Nearly three in four Canadians support (45%) or somewhat support (27%) businesses like airlines or movie theatres or other places where people are in close contact having the right to bar someone who does not have proof of vaccination.

Canadian sentiment on whether life will return to normal post-vaccine

Q

Do you agree, somewhat agree, somewhat disagree or disagree that with vaccines now being distributed in Canada your life will get back to normal by the end of 2021?

Source: Nanos Research, RDD dual frame hybrid telephone and online random survey, December 27th to 30th, n=1,048, accurate 3.0 percentage points plus or minus, 19 times out of 20.

Nanos conducted an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,048 Canadians, 18 years of age or older, between December 27th and 30th, 2020 as part of an omnibus survey. Participants were randomly recruited by telephone using live agents and administered a survey online. The sample included both land- and cell-lines across Canada. The results were statistically checked and weighted by age and gender using the latest Census information and the sample is geographically stratified to be representative of Canada.

Individuals randomly called using random digit dialling with a maximum of five call backs.

The margin of error for this survey is ± 3.0 percentage points, 19 times out of 20.

This study was commissioned by CTV News and the research was conducted by Nanos Research.

Note: Charts may not add up to 100 due to rounding.

Element	Description	Element	Description
Research sponsor	CTV News	Weighting of Data	The results were weighted by age and gender using the latest Census information (2016) and the sample is geographically stratified to ensure a distribution across all regions of Canada. See tables for full weighting disclosure
Population and Final Sample Size	1,048 Randomly selected individuals.	Screening	Screening ensured potential respondents did not work in the market research industry, in the advertising industry, in the media or a political party prior to administering the survey to ensure the integrity of the data.
Source of Sample	Nanos Hybrid Probability Panel	Excluded Demographics	Individuals younger than 18 years old; individuals without land or cell lines, and individuals without internet access could not participate.
Type of Sample	Probability	Stratification	By age and gender using the latest Census information (2016) and the sample is geographically stratified to be representative of Canada. Smaller areas such as Atlantic Canada were marginally oversampled to allow for a minimum regional sample.
Margin of Error	±3.0 percentage points, 19 times out of 20.	Estimated Response Rate	Fourteen percent, consistent with industry norms.
Mode of Survey	RDD dual frame (land- and cell-lines) hybrid telephone and online omnibus survey	Question Order	Question order in the preceding report reflects the order in which they appeared in the original questionnaire.
Sampling Method Base	The sample included both land- and cell-lines RDD (Random Digit Dialed) across Canada.	Question Content	Previous content included questions on the economy, politics, and real estate.
Demographics (Captured)	Atlantic Canada, Quebec, Ontario, Prairies, British Columbia; Men and Women; 18 years and older. Six digit postal code was used to validate geography.	Question Wording	The questions in the preceding report are written exactly as they were asked to individuals.
Fieldwork/Validation	Individuals were recruited using live interviews with live supervision to validate work, the research questions were administered online	Research/Data Collection Supplier	Nanos Research
Number of Calls	Maximum of five call backs to those recruited.	Contact	Contact Nanos Research for more information or with any concerns or questions. http://www.nanos.co Telephone:(613) 234-4666 ext. 237 Email: info@nanosresearch.com.
Time of Calls	Individuals recruited were called between 12-5:30 pm and 6:30-9:30pm local time for the respondent.		
Field Dates	December 27 th to 30 th , 2020.		
Language of Survey	The survey was conducted in both English and French.		
Standards	Nanos Research is a member of the Canadian Research Insights Council (CRIC) and confirms that this research fully complies with all CRIC Standards including the CRIC Public Opinion Research Standards and Disclosure Requirements. https://canadianresearchinsightscouncil.ca/standards/
