About the Nanos-Bloomberg tracking

Bloomberg Nanos Canadian Confidence Index (BNCCI) is a weekly measurement of the economic mood of Canadians.

The BNCCI is produced by the Nanos Research Corporation, headquartered in Canada, which operates in Canada and the United States. The data is based on random telephone interviews with 1,000 Canadian consumers (land- and cell-lines), using a four week rolling average of 250 respondents each week, 18 years of age and over.

The random sample of 1,000 respondents is weighted using the latest census information for Canada. The interviews are compiled into a four week rolling average of 1,000 interviews where each week, the oldest group of 250 interviews is dropped and a new group of 250 interviews is added.

The views of 1,000 respondents are compiled into a diffusion index from 0 to 100. A score of 50 on the diffusion index indicates that positive and negative views are a wash while scores above 50 suggest net positive views, while those below 50 suggest net negative views in terms of the economic mood of Canadians.

About the Weekly Nanos Tracking

The Nanos Party Power Index is a weekly composite measurement of federal party brands based on questions about the federal parties and their leadership. The National Issue Tracking data portal shows the unprompted top national issues of concern of Canadians over time.

The Weekly Nanos Tracking is produced by the Nanos Research Corporation. The data is based on a dual frame (land + cell-lines) random telephone interviews using live agents of 1,000 Canadians using a four week rolling average of 250 respondents each week, 18 years of age and over.

The random sample of 1,000 respondents is weighted by age and gender using the latest census information for Canada. The interviews are compiled into a four week rolling average of 1,000 interviews, where each week the oldest group of 250 interviews is dropped and a new group of 250 interviews is added.

About the Nanos CANAM surveys

The CAN-AM Tracking survey is an annual survey among Canadians and Americans that examines perceptions of Canada-US relations tracked over time.

The Nanos-UB North American Monitor is conducted by the Nanos Research Corporation. Parallel questions on bi-national issues are tracked by means of a hybrid telephone and online random sample of Canadians in the month of May, and a random representative online sample of Americans conducted in the month of June.

A Nanos RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,000 Canadians as part of an omnibus survey. Participants are randomly recruited by telephone using live agents and administered a survey online. The sample includes both land- and cell-lines across Canada. The results are statistically checked and weighted using the latest Census data. The margin of error for a random survey of 1,000 Canadians is ± 3.1 percentage points, 19 times out of 20.

A random representative online survey of 1,000 Americans was conducted. Results are statistically checked and weighted using the latest Census data.

Updated yearly with a new wave of data.

About the Nanos Policy Map survey

Track and explore the confidence and importance of a full range of public policy issues.

Nanos Policy Map tracking is conducted by the Nanos Research Corporation. Parallel questions on Canadian national issues are tracked by means of a hybrid telephone and online random sample of Canadians in the month of July.

Nanos conducts an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,000 Canadians as part of an omnibus survey. Participants are randomly recruited by telephone using live agents and administered a survey online. The sample includes both land- and cell-lines across Canada. The results are statistically checked and weighted by age and gender using the latest Census information and the sample is geographically stratified to be representative of Canada.

Updated yearly with a new wave of data.

Issue importance and confidence in finding solutions

For each of the challenges, please rate their importance to you on a scale of 1 to 10, where 1 is not at all important and 10 is very important in terms of Canada's future [RANDOMIZE]

For each of the challenges, are you confident, somewhat confident, somewhat not confident or not confident in our ability as a nation to find solutions? [RANDOMIZE]

About the AmCham-Nanos US Business Sentiment Tracking

Track and explore the sentiment of US businesses operating in Canada.

Nanos and AmCham Canada have created a co-branded index and research project based on a new confidence survey of American businesses operating in Canada. The Index provides sector intelligence and data that supports understanding of business trends.

Tracking is conducted by the Nanos Research Corporation. Questions on the expected change in number of employees, perceptions of the investment environment in Canada, expected changes to the Canadian economy, changes in sales and expected changes in sales are tracked by means of an online survey of U.S. businesses operating in Canada every year.

NANOS > AmCHAM-Nanos US Business Sentiment

Updated yearly with a new wave of data.

QUESTION – Over the next six months, do you expect the number of people your firm employs will increase, remain the same, or decrease?

The findings presented in this report are based on the compiled views of US businesses operating in Canada. The data presented in this research is part of a joint project by AmCham Canada and Nanos Research, presented by PNC Bank.
