

Confidence in being prepared for future health crises weak – Canadians want strategy to promote domestic research and manufacturing of medical innovations.

Key Findings

1

CANADA'S PREPAREDNESS FOR HEALTH CRISES

Almost six in ten Canadians think Canada is somewhat not prepared (31%) or not prepared (26%) to deal with future health crises. Canadians from the Prairies (31%) and Ontario (34%) are more likely to think Canada is not prepared than residents from the Atlantic (14%) and Quebec (16%).

2

IMPORTANCE OF CANADA'S MEDICAL RESEARCH & INNOVATION

Canadians give the highest importance score to Canada having a long-term national strategy to encourage medical research and innovation in Canada (mean of 8.8), followed by Canada conducting research to create medical innovations and Canada manufacturing its own medical innovations (mean of 8.4 each).

3

CANADA'S HANDLING OF COVID COMPARED TO OTHER COUNTRIES

Canadians are most likely to think Canada has done a better job at dealing with the pandemic compared to the United States (59%) and think Canada has done a worse job than China (46%) and Germany (36%). Canadians are split on whether Canada has done a better (30%) or worse job (32%) than the United Kingdom.

Key Findings

4

CANADA'S PERFORMANCE RELATED TO RESEARCH AND INNOVATION

Canadians are four times more likely to say Canada is doing very poor (17%) or poor job (31%) rather than a very good (1%) or good job (11%) at getting different levels of government to work together to encourage investment. Canadians aged 35 to 54 (52%) are more likely to say Canada is doing a very poor or poor job at this than younger Canadians (18-34) (40%).

5

CANADA'S PERFORMANCE RELATED TO RESEARCH AND INNOVATION

Canadians are also more likely to say that Canada is doing a very poor (13%) or poor (28%) job than a very good (2%) or good job (9%) at creating an environment which encourages more private sector investment in medical innovation. Canadians are split on whether Canada is doing a good job (13%) or a poor job (16%) at protecting Intellectual Property rights to encourage research and innovation.

6

SUPPORT FOR TAX INCENTIVES TO ENCOURAGE START-UPS

A strong majority of Canadians support (42%) or somewhat support (45%) providing new tax incentives to businesses in the technology and biotechnology industries to encourage more start-ups to build their company in Canada.

Canada's preparedness to deal with future health crises

Do you think Canada is prepared, somewhat prepared, somewhat not prepared or not prepared to deal with future health crises?

- Prepared
- Somewhat prepared
- Somewhat not prepared
- Not prepared
- Unsure

Somewhat not prepared/ not prepared

Source: Nanos Research, RDD dual frame hybrid telephone and online random survey, April 1st to 3rd, 2021, n=1,028, accurate 3.1 percentage points plus or minus, 19 times out of 20.

Nanos conducted an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,028 Canadians, 18 years of age or older, between April 1st and 3rd, 2021 as part of an omnibus survey. Participants were randomly recruited by telephone using live agents and administered a survey online. The results were statistically checked and weighted by age and gender using the latest Census information and the sample is geographically stratified to be representative of Canada.

Individuals were randomly called using random digit dialling with a maximum of five call backs.

The margin of error for a random survey of 1,000 Canadians is ± 3.1 percentage points, 19 times out of 20.

The research was commissioned by Ontario Bioscience Innovation Organization and was conducted by Nanos Research.

Note: Charts may not add up to 100 due to rounding.

Element	Description	Element	Description
Research sponsor	Ontario Bioscience Innovation Organization	Weighting of Data	The results were weighted by age and gender using the latest Census information (2016) and the sample is geographically stratified to ensure a distribution across all regions of Canada. See tables for full weighting disclosure
Population and Final Sample Size	1028 Randomly selected individuals.	Screening	Screening ensured potential respondents did not work in the market research industry, in the advertising industry, in the media or a political party prior to administering the survey to ensure the integrity of the data.
Source of Sample	Nanos Panel	Excluded Demographics	Individuals younger than 18 years old; individuals without land or cell lines, and individuals without internet access could not participate.
Type of Sample	Probability	Stratification	By age and gender using the latest Census information (2016) and the sample is geographically stratified to be representative of Canada. Smaller areas such as Atlantic Canada were marginally oversampled to allow for a minimum regional sample.
Margin of Error	±3.1 percentage points, 19 times out of 20.	Estimated Response Rate	Thirteen percent, consistent with industry norms.
Mode of Survey	RDD dual frame (land- and cell-lines) hybrid telephone and online omnibus survey	Question Order	Question order in the preceding report reflects the order in which they appeared in the original questionnaire.
Sampling Method Base	The sample included both land- and cell-lines RDD (Random Digit Dialed) across Canada.	Question Content	This was the first topic asked on the OMNIBUS.
Demographics (Captured)	Atlantic Canada, Quebec, Ontario, Prairies, British Columbia; Men and Women; 18 years and older. Six digit postal code was used to validate geography.	Question Wording	The questions in the preceding report are written exactly as they were asked to individuals.
Fieldwork/Validation	Individuals were recruited using live interviews with live supervision to validate work, the research questions were administered online	Research/Data Collection Supplier	Nanos Research
Number of Calls	Maximum of five call backs to those recruited.	Contact	Contact Nanos Research for more information or with any concerns or questions. http://www.nanos.co Telephone:(613) 234-4666 ext. 237 Email: info@nanosresearch.com.
Time of Calls	Individuals recruited were called between 12-5:30 pm and 6:30-9:30pm local time for the respondent.		
Field Dates	April 1 st to 3 rd , 2021.		
Language of Survey	The survey was conducted in both English and French.		
Standards	Nanos Research is a member of the Canadian Research Insights Council (CRIC) and confirms that this research fully complies with all CRIC Standards including the CRIC Public Opinion Research Standards and Disclosure Requirements. https://canadianresearchinsightscouncil.ca/standards/

NANOS RUTHERFORD MCKAY & Co.

As one of North America's premier market and public opinion research firms, we put strategic intelligence into the hands of decision makers. The majority of our work is for private sector and public facing organizations and ranges from market studies, managing reputation through to leveraging data intelligence. Nanos Research offers a vertically integrated full service quantitative and qualitative research practice to attain the highest standards and the greatest control over the research process. www.nanos.co

This international joint venture between [dimap](#) and [Nanos](#) brings together top research and data experts from North American and Europe to deliver exceptional data intelligence to clients. The team offers data intelligence services ranging from demographic and sentiment microtargeting; consumer sentiment identification and decision conversion; and, data analytics and profiling for consumer persuasion. www.nanosdimap.com

NRM is an affiliate of Nanos Research and Rutherford McKay Associates. Our service offerings are based on decades of professional experience and extensive research and include public acceptance and engagement, communications audits, and narrative development. www.nrmpublicaffairs.com
