

# *Coronavirus concern as top national issue equivalent to March 2020 before pandemic ramp-up*

*Nanos Weekly Tracking, ending July 23, 2021  
(released July 27, 2021)*

*Ideas powered by  
world-class data*

Nanos tracks unprompted issues of concern every week and is uniquely positioned to monitor the trajectory of opinion on Covid-19. This first was on the Nanos radar the week of January 24, 2020. To access full weekly national and regional tracking visit the Nanos subscriber data portal.

“

*Coronavirus remains the top unprompted national issue of concern but is below the one year average and near levels at the beginning of the pandemic.*

”

*Nik Nanos*

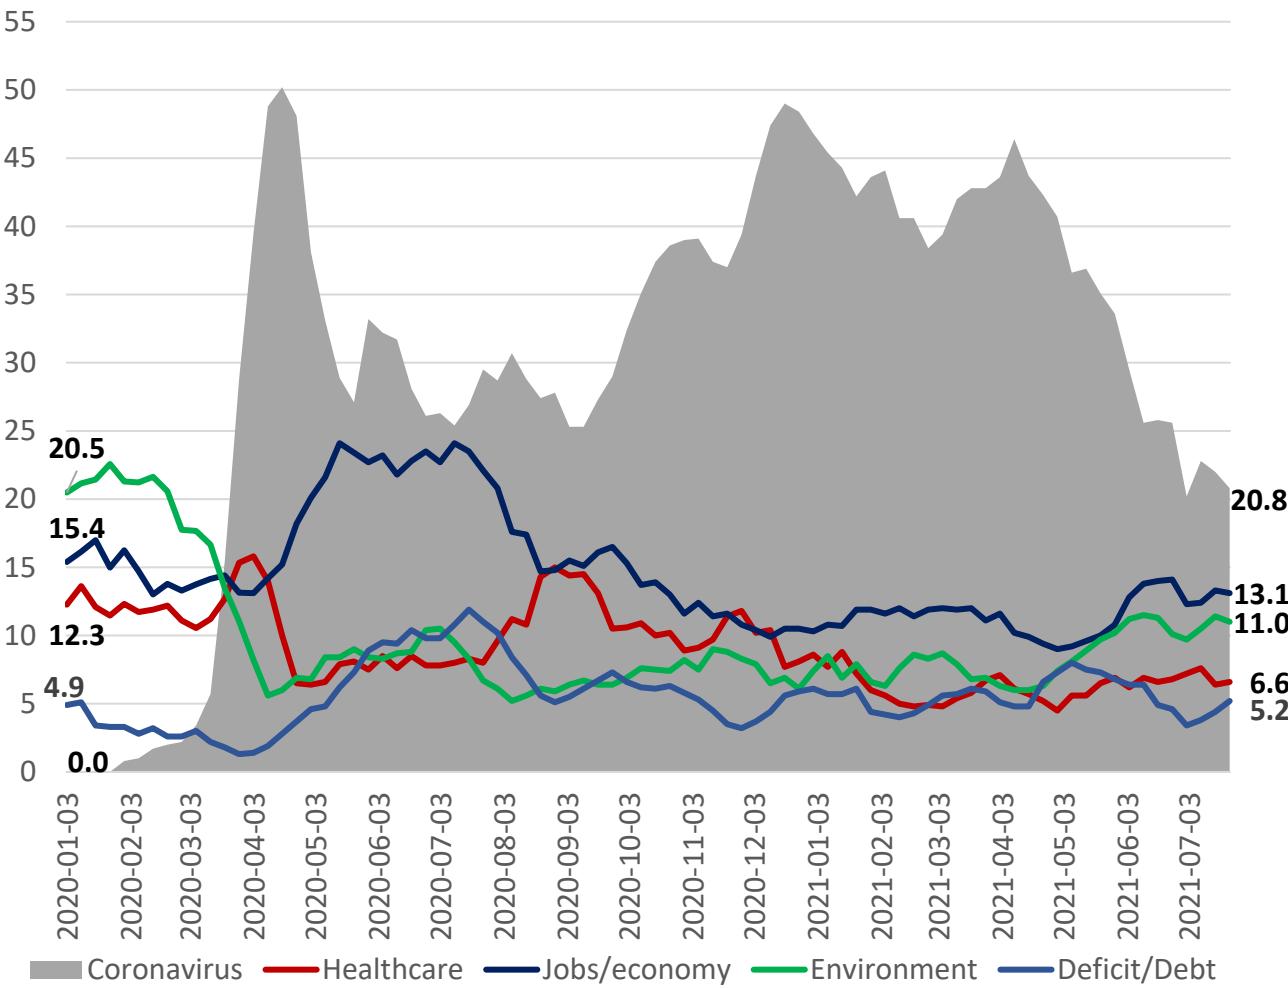

# ISSUE TRACKING - CORONAVIRUS

1,000 random interviews recruited from an RDD land-and cell-line sample of Canadians age 18 years and over, ending July 23, 2021. The data is based on a four week rolling average where each week the oldest group of 250 interviews is dropped and a new group of 250 is added. A random survey of 1,000 Canadians is accurate 3.1 percentage points, plus or minus, 19 times out of 20.

# PARTY POWER INDEX

*Canada Weekly Index Tracking Scores  
(Ending July 23, 2021, n=1,000)*

The Nanos Party Power Index Tracking for Canada is based on a composite of the following public opinion measures: the national ballot, which party individuals would consider voting for, the top two choices for Prime Minister, and whether each party leader has good leadership qualities.

# METHODOLOGY

# METHODOLOGY

The Weekly Nanos Tracking is produced by the Nanos Research Corporation, headquartered in Canada, which operates in Canada and the United States. The data is based on random interviews with 1,000 Canadian consumers (recruited by RDD land- and cell-line sample), using a four-week rolling average of 250 respondents each week, 18 years of age and over. The random sample of 1,000 respondents may be weighted using the latest census information for Canada. The interviews are compiled into a four-week rolling average of 1,000 interviews where each week, the oldest group of 250 interviews is dropped and a new group of 250 interviews is added.

A random survey of 1,000 respondents in Canada is accurate 3.1 percentage points, plus or minus, 19 times out of 20. This report is based on the four waves of tracking ending July 23, 2021. Readers should note that due to the Covid-19 outbreak and ESOMAR standards between April 3 and July 24, 2020 Nanos used its probability online panel. Data collection returned to telephone as of the week of July 31, 2020. The data collection returned to the Nanos probability panel as of the week ending January 1, 2021 due to the lockdown imposed by the provincial health authorities. Data collection returned to telephone between the weeks ending March 19th and April 9th, 2021. As a result of the latest provincial lockdown the tracking returned to Nanos probability online panel between April 16, and June 11, 2021. Tracking returned to telephone as of the week ending June 18, 2021.

Since voters are not actually able to make a choice between elections, it is interesting to think about party strength and support more broadly. The Nanos Party Power Index fills this need by incorporating more information than just current vote preference.

The Nanos Party Power Index is a weekly composite measurement of federal party brands based on four questions about the federal parties and their leadership. The questions include:

- a ballot question that captures the 1<sup>st</sup> and 2<sup>nd</sup> vote preferences;
- a measure of whether the respondent would consider voting for the party;
- the 1<sup>st</sup> and 2<sup>nd</sup> preferences for Prime Minister of the current federal leaders; and,
- whether the respondent believes each current leader has the quality to be a good leader.

The views of 1,000 respondents are compiled into a diffusion brand index for each party that goes from 0 to 100, where 0 means that the party has no brand strength and 100 means it has maximum brand strength. A score above 50 is an indication of brand strength for the party and its leader at this time. The important factors in this weekly tracking include the direction of the brand strength or weakness and also the brand strength of one federal party relative to another.

# MÉTHODOLOGIE

Le suivi hebdomadaire de Nanos est produit par Nanos Research Corporation. Les données sont fondées sur des entrevues aléatoires avec 1000 consommateurs canadiens (recrutés au téléphone à l'aide de l'échantillonnage à deux trames (terrestre et cellulaire) avec des agents en direct, utilisant une moyenne mobile de quatre semaines avec 250 répondants chaque semaine, âgés de 18 ans et plus. L'échantillon aléatoire de 1000 répondants peut être pondéré selon l'âge et le sexe en utilisant les dernières données du recensement pour le Canada. Les entrevues sont compilées en une moyenne mobile de 1000 entrevues sur quatre semaines, où chaque semaine, le groupe de 250 Canadiens le plus anciennement interrogé est abandonné et un nouveau groupe de 250 entrevues est ajouté.

Un sondage aléatoire auprès de 1000 Canadiens est exact à  $\pm 3,1$  points de pourcentage, plus ou moins, 19 fois sur 20. Les données présentées dans ce rapport sont basées sur la période de suivi se terminant le 23 juillet 2021. Les lecteurs doivent noter qu'à cause de la pandémie Covid-19 et les normes ESOMAR, à partir du 3 avril 2020, Nanos a utilisé son panel probabiliste. Les entrevues ont été menées par téléphone à nouveau à partir de la semaine du 31 juillet. Nanos a utilisé son panel probabiliste à partir de la semaine qui termine le 1 janvier 2021 en raison de la quarantaine de quatre semaines imposé par les autorités de santé publiques provinciales. Nanos a mené une enquête téléphonique (lignes téléphoniques terrestres et cellulaires) par génération aléatoire de numéros de téléphone (GANT) à partir de la semaine du 19 mars, 2021 jusqu'au 10 avril, 2021. Nanos a utilisé de nouveau son panel probabiliste entre le 16 avril 2021 jusqu'à la semaine se terminant le 11 juin en raison de la quarantaine imposé par les autorités de santé publiques provinciales. L'enquête est menée de nouveau par téléphone à partir de la semaine se terminant le 18 juin.

Comme les électeurs ne sont pas en mesure de faire un choix entre les élections il est intéressant de penser à la force du parti et à son soutien à un niveau plus large. Le suivi fédéral de Nanos répond à ce besoin en incorporant plus d'informations sur les préférences politiques, au-delà de la préférence actuelle de vote.

Le suivi fédéral de Nanos est une mesure composite hebdomadaire des marques des partis fédéraux fondée sur quatre questions concernant les partis fédéraux et leur leadership. Les questions comprennent:

- une question de scrutin qui capture les préférences de premier et de second vote;
- une mesure permettant de savoir si le répondant envisagerait de voter pour un parti donné;
- la 1ère et 2ème préférence pour Premier ministre parmi les dirigeants fédéraux actuels; et,
- si le répondant croit que chaque leader actuel possède les qualités d'un bon leader.

Les opinions de 1000 répondants sont compilées dans un indice de marque de diffusion pour chaque parti qui va de 0 à 100, où 0 signifie que le parti n'a pas de force de marque et 100 signifie qu'il a la force de marque maximale. Un score supérieur à 50 est une indication de force de marque pour ce parti et son leadership en ce moment. Les facteurs importants dans ce suivi hebdomadaire incluent la direction de la force ou de la faiblesse de marque ainsi que la force de marque d'un parti fédéral par rapport à un autre.

# TECHNICAL NOTE

| Element                                    | Description  | Element                 | Description  |
|--|--|-------------------------|--|
| Organization who commissioned the research | Nanos Research   | Weighting of Data       | The results were weighted by age and gender using the latest Census information (2016) and the sample is geographically stratified to ensure a distribution across all regions of Canada. See tables for full weighting disclosure.                |
| Final Sample Size                          | 1,000 Randomly selected individuals, four week rolling average of 250 interviews a week.   | Screening               | Screening ensured potential respondents did not work in the market research industry, in the advertising industry, in the media or a political party prior to administering the survey to ensure the integrity of the data.                        |
| Margin of Error                            | ±3.1 percentage points, 19 times out of 20.  | Excluded Demographics   | Individuals younger than 18 years old; individuals without land or cell line or internet could not participate.  |
| Mode of Survey                             | Recruited by RDD dual frame (land- and cell-lines) telephone survey.   | Stratification          | By age and gender using the latest Census information (2016) and the sample is geographically stratified to be representative of Canada. Smaller areas such as Atlantic Canada were marginally oversampled to allow for a minimum regional sample. |
| Sampling Method Base                       | The sample included both land- and cell-lines RDD (Random Digit Dialed) across Canada.   | Estimated Response Rate | Nine percent, consistent with industry norms.  |
| Demographics (Captured)                    | Atlantic Canada, Quebec, Ontario, Prairies, British Columbia; Men and Women; 18 years and older. Six-digit postal code was used to validate geography.   | Question Order          | Question order in the preceding report was asked in the following order – unprompted issue of concern, party consideration, unprompted vote preferences, preferred Prime Minister and qualities of a good political leader.                        |
| Demographics (Other)                       | Age, gender, education, income   | Question Content        | This was module one of a weekly tracking survey.   |
| Fieldwork/Validation                       | Live interviews with live supervision to validate work. Online probability effective July 23, 2021.  | Question Wording        | The wording of questions is as presented in the report with a randomization of the political leaders for the question involving leader qualities.  |

| Élément                                  | Description  | Élément                       | Description  |
|--|--|-------------------------------|--|
| Organisation qui a commandé la recherche | Nanos Research   | Pondération des données       | Les résultats ont été pondérés selon l'âge et le sexe en utilisant les données du dernier recensement (2016) et l'échantillon est stratifié géographiquement pour être représentatif du Canada. Voir les tableaux pour la divulgation complète de la pondération.                    |
| Taille finale de l'échantillon           | 1,000 répondants choisis au hasard, moyenne mobile de quatre semaines avec 250 répondants chaque semaine.  | Présélection                  | La présélection garantit que les répondants potentiels ne travaillaient pas dans le secteur des études de marché, dans le secteur de la publicité, dans les médias ou pour un parti politique avant l'administration de l'enquête pour assurer l'intégrité des données.              |
| Marge d'erreur                           | ±3,1 points de pourcentage, 19 fois sur 20.  | Groupes démographiques exclus | Les personnes de moins de 18 ans; les individus sans accès à lignes de téléphone n'étaient pas admissibles pour participer.  |
| Type d'enquête                           | Enquête téléphonique (lignes téléphoniques terrestres et cellulaires) par génération aléatoire de numéros de téléphone (GANT).   | Stratification                | Par âge et sexe en utilisant les données du dernier recensement (2016) et l'échantillon est stratifié géographiquement pour être représentatif du Canada. Les régions plus petites comme le Canada Atlantique furent suréchantillonées pour assurer un échantillon régional minimum. |
| Méthode d'échantillonnage                | L'échantillon recruté par des lignes terrestres et cellulaires à travers le Canada par l'entremise de génération aléatoire de numéros de téléphone (GANT).                           | Taux de réponse estimé        | Neuf pour cent, en conformité avec les normes de l'industrie.  |
| Données démographiques (captées)         | Canada Atlantique, Québec, Ontario, Prairies, Colombie-Britannique; hommes et femmes; 18 ans et plus. Le code postal à six chiffres fut utilisé pour valider l'endroit géographique. | Ordre des questions           | Les questions de ce rapport ont été posées dans l'ordre suivant : enjeu, considération de vote, les préférences de vote spontanées, le Premier ministre préféré et les qualités d'un bon leader politique.   |
| Données démographiques (autres)          | Âge, sexe, éducation, revenu   | Contenu des questions         | Ceci fait partie d'une enquête de suivi hebdomadaire et est le premier module.   |
| Travail sur le terrain/validation        | Entrevues en direct administrées par des agents et sous supervision du travail. Enquête en ligne à partir du 14 mai 2021.  | Formulation des questions     | La formulation des questions est telle que présentée dans le rapport, les leaders politiques ont été affichés de manière aléatoire pour la question impliquant les qualités d'un bon leader.   |
| Nombre d'appels                          | Maximum de cinq rappels.   | Compagnie de recherche        | Nanos Research   |
| Heure des appels                         | Heure locale 17h à 21h, fins de semaine 12h à 18h.   | Contactez                     | Contactez Nanos Research pour de plus amples renseignements ou si vous avez des questions ou des préoccupations.<br><a href="http://www.nanos.co">http://www.nanos.co</a><br>Téléphone :(613) 234-4666 x 237<br>Courriel : info@nanosresearch.com.                                   |
| Dates du travail sur le terrain          | Période de quatre semaines terminant le 23 Juillet 2021.   |                               |  |
| Langue de l'enquête                      | L'enquête a été menée en français et en anglais.   |                               |  |
| Standards                                | Ce rapport dépasse les normes établies par CRIC, ESOMAR et AAPOR.  |                               |  |

# ABOUT NANOS

**nanos dimap analytika**

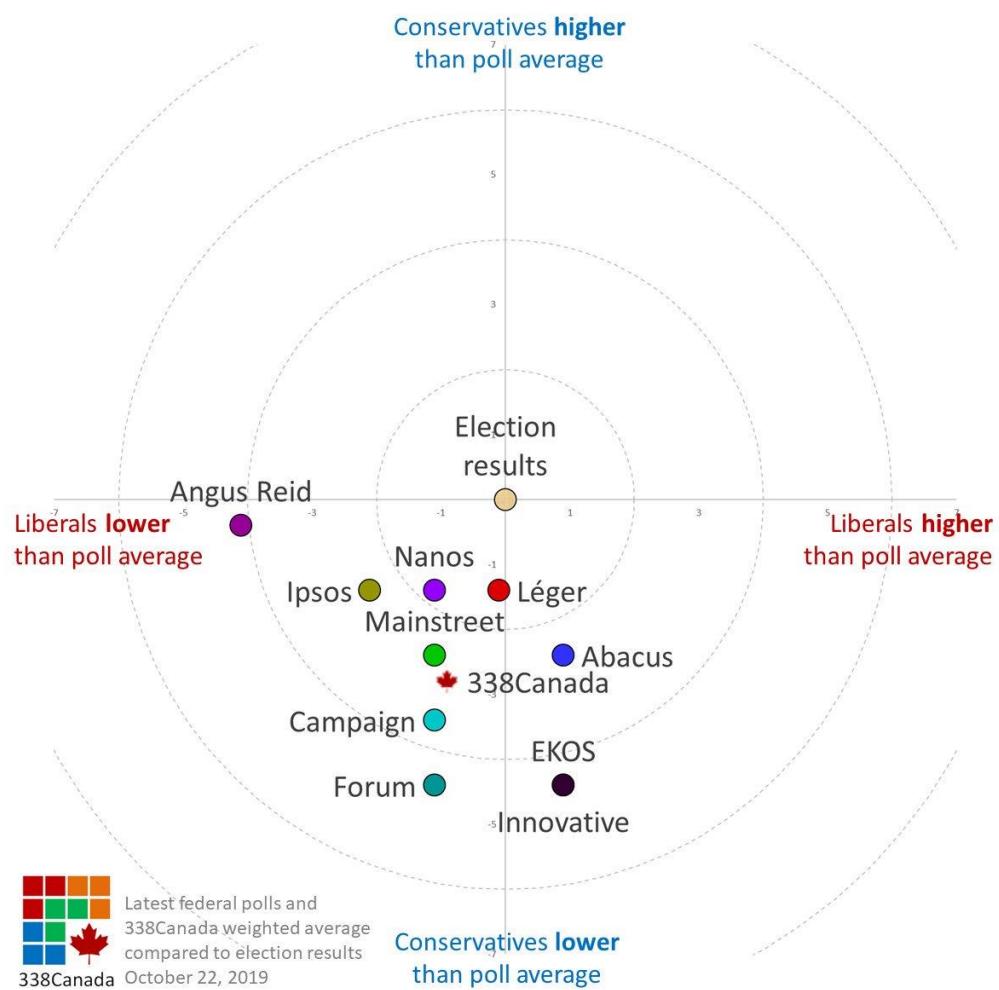

NANOS RUTHERFORD MCKAY & Co.

As one of North America's premier market and public opinion research firms, we put strategic intelligence into the hands of decision makers. The majority of our work is for private sector and public facing organizations and ranges from market studies, managing reputation through to leveraging data intelligence. Nanos Research offers a vertically integrated full service quantitative and qualitative research practice to attain the highest standards and the greatest control over the research process.  
[www.nanos.co](http://www.nanos.co)

This international joint venture between dimap and Nanos brings together top research and data experts from North America and Europe to deliver exceptional data intelligence to clients. The team offers data intelligence services ranging from demographic and sentiment microtargeting; consumer sentiment identification and decision conversion; and, data analytics and profiling for consumer persuasion.
