Nanos conducted an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,002 Canadians, 18 years of age or older, between July 30th to August 2nd, 2021 as part of an omnibus survey. Participants were randomly recruited by telephone using live agents and administered a survey online. The sample included both land- and cell-lines across Canada. The results were statistically checked and weighted by age and gender using the latest Census information and the sample is geographically stratified to be representative of Canada.

Individuals randomly called using random digit dialling with a maximum of five call backs.

The margin of error for this survey is ± 3.1 percentage points, 19 times out of 20.

This study was commissioned by the Globe and Mail and the research was conducted by Nanos Research.

Note: Charts may not add up to 100 due to rounding

Element	Description	Element	Description				
Research sponsor	The Globe and Mail	Weighting of Data	The results were weighted by age and gender using the latest Census information (2016) and the sample is geographically stratified to				
Population and Final Sample Size	1002 Randomly selected individuals.	Weighting of Data	ensure a distribution across all regions of Canada. See tables for full weighting disclosure				
Source of Sample	Nanos Hybrid Probability Panel	Communication	Screening ensured potential respondents did not work in the market research industry, in the advertising industry, in the media or a political party prior to administering the survey to ensure the integrity of the data.				
Type of Sample	Probability	Screening					
Margin of Error	±3.1 percentage points, 19 times out of 20.		Individuals younger than 18 years old; individuals without land or cell lines, and individuals without internet access could not participate.				
Mode of Survey	RDD dual frame (land- and cell-lines) hybrid telephone and online omnibus survey	Excluded Demographics					
Sampling Method Base	The sample included both land- and cell-lines RDD (Random Digit Dialed) across Canada.	Stratification	By age and gender using the latest Census information (2016) and the sample is geographically stratified to be representative of Canada. Smaller areas such as Atlantic Canada were marginally oversampled to allow for a minimum regional sample.				
Demographics (Captured)	Atlantic Canada, Quebec, Ontario, Prairies, British Columbia; Men and Women; 18 years and older. Six digit postal code was used to validate geography.	Estimated Response Rate	14 percent, consistent with industry norms.				
Fieldwork/Validation	Individuals were recruited using live interviews with live supervision to validate work, the research questions were administered online	Question Order	Question order in the preceding report reflects the order in which they appeared in the original questionnaire.				
Number of Calls	Maximum of five call backs to those recruited.		they appeared in the original questionnaire.				
Time of Calls	Individuals recruited were called between 12-5:30 pm and 6:30-9:30pm local time for the respondent.	Question Content	Previous content included questions political and economics issues, federal election, vaccinations and the 2022 Olympics.				
Field Dates	July 30 th to August 2 nd , 2021	Question Wording	The questions in the preceding report are written exactly as they were asked to individuals.				
Language of Survey	The survey was conducted in both English and French.	Research/Data Collection Supplier	Nanos Research
