

Nearly two thirds of Canadians support healthcare workers refusing treatment to threatening or disrespectful unvaccinated patients.

# Key Findings

---

## REFUSING TREATMENT OF THREATENING UNVACCINATED PATIENTS

A majority of Canadians support (40%) or somewhat support (24%) healthcare workers refusing treatment to unvaccinated patients who are threatening/disrespectful. British Columbia residents are more likely to support this (50%) than Quebec residents (29%).

## STRICTNESS OF RULES

Majority of Canadians say that the restrictions to need to be fully vaccinated to go to indoor public spaces and to a workplace in person are just right (63% and 60%, respectively). One in five Canadians say these restrictions are not strict enough (22%) and 14 per cent say they are too strict.

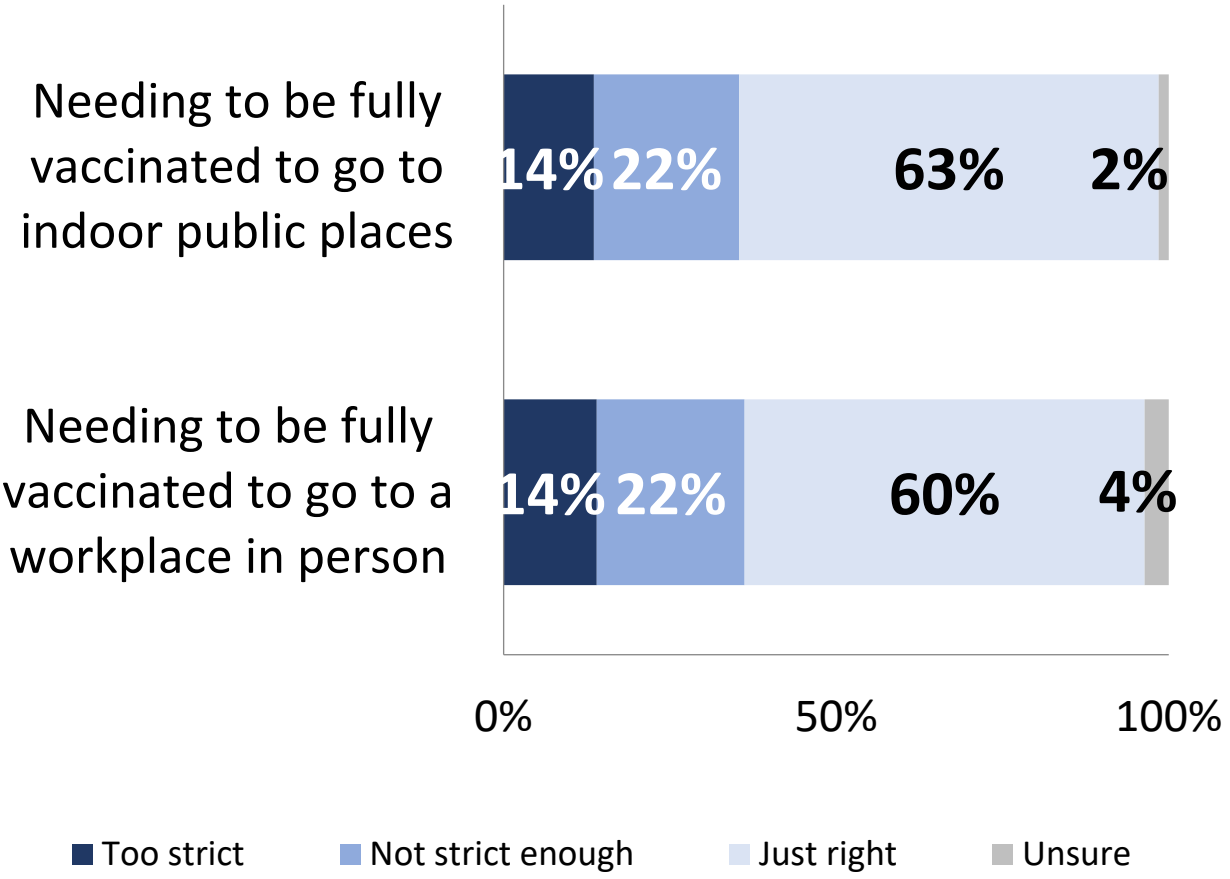

## ENFORCEMENT OF RULES

Canadians are most likely to say staff of the businesses (56%) should be responsible for ensuring that customers that visit a business are vaccinated, followed by government employees (18%), other (10%), and the police (three per cent).

# Strictness of restrictions

Q Would you say that the following restrictions on people who are not vaccinated are too strict, not strict enough or just right? [ROTATE Q1 and Q2]

“ Majority of Canadians say that the restrictions to need to be fully vaccinated to go to indoor public spaces and to a workplace in person are just right. Residents of the Prairies are more likely to say these restrictions are not strict enough (28% each), than residents of the Atlantic (17% and 15%, respectively). ”

Q

Who should be ensuring that customers that visit a business are vaccinated [RANDOMIZE]

\*Weighted to the true population proportion.

\*Charts may not add up to 100 due to rounding.

Source: Nanos Research, RDD dual frame hybrid telephone and online random survey, September 30<sup>th</sup> to October 3<sup>rd</sup>, 2021, n=1017, accurate 3.1 percentage points plus or minus, 19 times out of 20.

Nanos conducted an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,017 Canadians, 18 years of age or older, between September 30<sup>th</sup> to October 3<sup>rd</sup>, 2021, as part of an omnibus survey. Participants were randomly recruited by telephone using live agents and administered a survey online. The sample included both land- and cell-lines across Canada. The results were statistically checked and weighted by age and gender using the latest Census information and the sample is geographically stratified to be representative of Canada.

Individuals randomly called using random digit dialling with a maximum of five call backs.

The margin of error for this survey is  $\pm 3.1$  percentage points, 19 times out of 20.

This study was commissioned by CTV News and the research was conducted by Nanos Research.

Note: Charts may not add up to 100 due to rounding.

Element	Description	Element	Description
Research sponsor	CTV News	Weighting of Data	The results were weighted by age and gender using the latest Census information (2016) and the sample is geographically stratified to ensure a distribution across all regions of Canada. See tables for full weighting disclosure
Population and Final Sample Size	1017 Randomly selected individuals.	Screening	Screening ensured potential respondents did not work in the market research industry, in the advertising industry, in the media or a political party prior to administering the survey to ensure the integrity of the data.
Source of Sample	Nanos Hybrid Probability Panel	Excluded Demographics	Individuals younger than 18 years old; individuals without land or cell lines, and individuals without internet access could not participate.
Type of Sample	Probability	Stratification	By age and gender using the latest Census information (2016) and the sample is geographically stratified to be representative of Canada. Smaller areas such as Atlantic Canada were marginally oversampled to allow for a minimum regional sample.
Margin of Error	±3.1 percentage points, 19 times out of 20.	Estimated Response Rate	15 percent, consistent with industry norms.
Mode of Survey	RDD dual frame (land- and cell-lines) hybrid telephone and online omnibus survey	Question Order	Question order in the preceding report reflects the order in which they appeared in the original questionnaire.
Sampling Method Base	The sample included both land- and cell-lines RDD (Random Digit Dialed) across Canada.	Question Content	Previous content on the omnibus included economic and political questions.
Demographics (Captured)	Atlantic Canada, Quebec, Ontario, Prairies, British Columbia; Men and Women; 18 years and older. Six digit postal code was used to validate geography.	Question Wording	The questions in the preceding report are written exactly as they were asked to individuals.
Fieldwork/Validation	Individuals were recruited using live interviews with live supervision to validate work, the research questions were administered online	Research/Data Collection Supplier	Nanos Research
Number of Calls	Maximum of five call backs to those recruited.	Contact	Contact Nanos Research for more information or with any concerns or questions. <a href="http://www.nanos.co">http://www.nanos.co</a> Telephone:(613) 234-4666 ext. 237 Email: info@nanosresearch.com.
Time of Calls	Individuals recruited were called between 12-5:30 pm and 6:30-9:30pm local time for the respondent.		
Field Dates	September 30 <sup>th</sup> to October 3 <sup>rd</sup> , 2021.		
Language of Survey	The survey was conducted in both English and French.		
Standards	Nanos Research is a member of the Canadian Research Insights Council (CRIC) and confirms that this research fully complies with all CRIC Standards including the CRIC Public Opinion Research Standards and Disclosure Requirements. <a href="https://canadianresearchinsightscouncil.ca/standards/">https://canadianresearchinsightscouncil.ca/standards/</a>

NANOS RUTHERFORD MCKAY & Co.

As one of North America's premier market and public opinion research firms, we put strategic intelligence into the hands of decision makers. The majority of our work is for private sector and public facing organizations and ranges from market studies, managing reputation through to leveraging data intelligence. Nanos Research offers a vertically integrated full service quantitative and qualitative research practice to attain the highest standards and the greatest control over the research process. [www.nanos.co](http://www.nanos.co)

This international joint venture between [dimap](http://www.dimap.com) and [Nanos](http://www.nanos.co) brings together top research and data experts from North American and Europe to deliver exceptional data intelligence to clients. The team offers data intelligence services ranging from demographic and sentiment microtargeting; consumer sentiment identification and decision conversion; and, data analytics and profiling for consumer persuasion.
