Canadians are six times more likely to say climate change has had some sort of negative impact rather than a positive one on their health.

## IMPACT OF CLIMATE CHANGE

Canadians are six times more likely to report that climate change has had a negative (11\%) or somewhat negative (30\%) impact on their day-to-day health than a positive (two per cent) or somewhat positive (four per cent) impact. Two in five say it has had no impact.

## ELECTRIC CARS

Close to two thirds of Canadians
show interest (31\% interested, 34\% somewhat interested) in owning an electric car. Interest is higher among Canadians from BC (47\% interested) and younger Canadians
(45\% of those 18-35 are interested)

## FOREIGN AID TO REDUCE EMISSSIONS

Six in ten Canadians support (28\%) or somewhat support (33\%) increasing Canadian foreign aid to help developing countries reduce their carbon emissions. Canadians in the Prairies were most likely to oppose this (32\% oppose, compared to $20 \%$ of Canadians overall).

## CUTTING BACK ON NECESSITIES

Nearly one third of Canadians
(29\%) say they will have to cut back on necessities this winter because of the increase in the prices of gas and fuel. Canadians from the

Prairies (42\%) and younger
Canadians (38\%) are more likely to report this.

## Attitudes on spending as natural gas and fuel prices have been increasing

 Because of these price increases, [ROTATE] will you have to cut back spending on other necessities, or will your spending on necessities generally be about the same this winter?

Over six in ten Canadians say their spending on necessities will generally be about the same this winter despite natural gas and fuel price increases.

Canadians aged 18 to 34 are more likely to say they will have to cut back spending on other necessities because of these price increases (38\%) than older Canadians (aged 55 plus) (22\%).
$\square$ I will have to cut back spending on other necessities this winter
$\square$ My spending on necessities will be about the same this winter

- Unsure

Nanos conducted an RDD dual frame (land- and celllines) hybrid telephone and online random survey of 1,026 Canadians, 18 years of age or older, between October $31^{\text {st }}$ and November $3^{\text {rd }}, 2021$, as part of an omnibus survey. Participants were randomly recruited by telephone using live agents and administered a survey online. The sample included both land- and cell-lines across Canada. The results were statistically checked and weighted by age and gender using the latest Census information and the sample is geographically stratified to be representative of Canada.
Individuals randomly called using random digit dialling with a maximum of five call backs.

The margin of error for this survey is $\pm 3.1$ percentage points, 19 times out of 20.

This study was commissioned by CTV News and the research was conducted by Nanos Research.

Note: Charts may not add up to 100 due to rounding.

| Element | Description | Element | Description |
| :---: | :---: | :---: | :---: |
| Research sponsor | CTV News | Weighting of Data | The results were weighted by age and gender using the latest Census information (2016) and the sample is geographically stratified to ensure a distribution across all regions of Canada. See tables for full weighting |
| Population and Final Sample Size | 1026 Randomly selected individuals. |  | disclosure |
| Source of Sample | Nanos Hybrid Probability Panel | Screening | Screening ensured potential respondents did not work in the market research industry, in the advertising industry, in the media or a political party prior to administering the survey to ensure the integrity of the |
| Type of Sample | Probability |  | data. |
