

Close to six in ten Canadians are comfortable or somewhat comfortable with the agreement between the Liberals and the NDP which would delay a possible election until 2025 – one in three say it has no impact on their vote intention.

Level of comfort on Liberal-NDP cooperation agreement

- Comfortable
- Somewhat Comfortable
- Somewhat uncomfortable
- Uncomfortable
- Unsure

Q In March 2022, the federal Liberal and NDP parties announced they would have a formal Parliamentary cooperation agreement in which NDP MPs pledged to vote to keep the Liberal government in power until June 2025 in exchange for government action on NDP policy priorities, such as dental care. Are you comfortable, somewhat comfortable, somewhat uncomfortable or uncomfortable with the agreement between the Liberals and the NDP which would delay a possible election until 2025?

“ Close to six in ten Canadians are comfortable or somewhat comfortable with the agreement between the Liberals and the NDP which would delay a possible election until 2025. Ontario residents are most likely to say so (48% comfortable, 16% somewhat comfortable) compared to Prairie residents (30% comfortable, 13% somewhat comfortable). ”

*Weighted to the true population proportion.
 *Charts may not add up to 100 due to rounding.
 *The net score is the difference between all positive and negative numbers in a question.

Level of comfort on Liberal-NDP cooperation agreement by demographics

Impact of Liberal-NDP agreement on likelihood of voting for a political party

Q Thinking about the formal Parliamentary cooperation agreement between the federal Liberal and NDP Parties, what impact, if any, will it have on your likelihood to vote for the following political parties in the next federal election: [RANDOMIZE]

“ About one in three Canadians say the Parliamentary cooperation agreement between the federal Liberal and NDP Parties will have no impact on their vote. One in four say it makes them more likely to vote Conservative, while just under one in five each say it makes them more likely to vote Liberal or NDP. ”

*Weighted to the true population proportion.
 *Charts may not add up to 100 due to rounding.

Source: Nanos Research, RDD dual frame hybrid telephone and online random survey, May 26th to 30th, 2022, n=1,001, accurate 3.1 percentage points plus or minus, 19 times out of 20.

Nanos conducted an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,001 Canadians, 18 years of age or older, between May 26th and 30th, 2022 as part of an omnibus survey. Participants were randomly recruited by telephone using live agents and administered a survey online. The sample included both land- and cell-lines across Canada. The results were statistically checked and weighted by age and gender using the latest Census information and the sample is geographically stratified to be representative of Canada.

Individuals randomly called using random digit dialing with a maximum of five call backs.

The margin of error for this survey is ±3.1 percentage points, 19 times out of 20.

This study was commissioned by the Globe and Mail and the research was conducted by Nanos Research.

Note: Charts may not add up to 100 due to rounding

METHODOLOGY

Element	Description	Element	Description
Research sponsor	The Globe and Mail	Weighting of Data	The results were weighted by age and gender using the latest Census information (2016) and the sample is geographically stratified to ensure a distribution across all regions of Canada. See tables for full weighting disclosure
Population and Final Sample Size	1001 Randomly selected individuals.	Screening	Screening ensured potential respondents did not work in the market research industry, in the advertising industry, in the media or a political party prior to administering the survey to ensure the integrity of the data.
Source of Sample	Nanos Hybrid Probability Panel	Excluded Demographics	Individuals younger than 18 years old; individuals without land or cell lines, and individuals without internet access could not participate.
Type of Sample	Probability	Stratification	By age and gender using the latest Census information (2016) and the sample is geographically stratified to be representative of Canada. Smaller areas such as Atlantic Canada were marginally oversampled to allow for a minimum regional sample.
Margin of Error	±3.1 percentage points, 19 times out of 20.	Estimated Response Rate	11 percent, consistent with industry norms.
Mode of Survey	RDD dual frame (land- and cell-lines) hybrid telephone and online omnibus survey	Question Order	Question order in the preceding report reflects the order in which they appeared in the original questionnaire.
Sampling Method Base	The sample included both land- and cell-lines RDD (Random Digit Dialed) across Canada.	Question Content	Topics on the omnibus ahead of the survey content included: views on political and economic issues.
Demographics (Captured)	Atlantic Canada, Quebec, Ontario, Prairies, British Columbia; Men and Women; 18 years and older. Six digit postal code was used to validate geography.	Question Wording	The questions in the preceding report are written exactly as they were asked to individuals.
Fieldwork/Validation	Individuals were recruited using live interviews with live supervision to validate work, the research questions were administered online	Research/Data Collection Supplier	Nanos Research
Number of Calls	Maximum of five call backs to those recruited.	Contact	Contact Nanos Research for more information or with any concerns or questions. http://www.nanos.co Telephone:(613) 234-4666 ext. 237 Email: info@nanosresearch.com.
Time of Calls	Individuals recruited were called between 12-5:30 pm and 6:30-9:30pm local time for the respondent.		
Field Dates	May 26 th to 30 th , 2022.		
Language of Survey	The survey was conducted in both English and French.		
Standards	Nanos Research is a member of the Canadian Research Insights Council (CRIC) and confirms that this research fully complies with all CRIC Standards including the CRIC Public Opinion Research Standards and Disclosure Requirements. https://canadianresearchinsightscouncil.ca/standards/		

As one of North America’s premier market and public opinion research firms, we put strategic intelligence into the hands of decision makers. The majority of our work is for private sector and public facing organizations and ranges from market studies, managing reputation through to leveraging data intelligence. Nanos Research offers a vertically integrated full service quantitative and qualitative research practice to attain the highest standards and the greatest control over the research process. www.nanos.co
