Trudeau and Poilievre tie for party leader the most trusted to make Canada a better country; half of Canadians want new leadership for Liberal and Conservative parties going into the next election.

THE GLOBE AND MAIL

n NANOS

Nanos was retained by the Globe and Mail to conduct research among Canadians to gauge their views on the preferred leaders for the Liberal Party, the Conservative Party and the New Democratic Party of Canada, as well as who is the most trusted leader to make Canada a better country and which federal party they usually vote for.

Nanos conducted an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,055 Canadians, 18 years of age or older, between June 29th to 30th, 2023 as part of an omnibus survey. The margin of error for this survey is ±3.0 percentage points, 19 times out of 20.

This study was commissioned by the Globe and Mail and the research was conducted by Nanos Research.

About the Research

Key Findings

1

Canadians have equal trust in Trudeau or Poilievre to make Canada a better country

One in four Canadians each say that Justin Trudeau (25%) or Pierre Poilievre (25%) are the federal party leaders they trust the most to make Canada a better country, followed by none of them (22%) and Jagmeet Singh (12%). Swing voters (those without a party they usually vote for) are most likely to say they do not trust any of them (38%), with about two in each saying they trust Trudeau (21%) or Poilievre (18%) the most.

2

More than one in two Canadians think the Liberal Party should have a new leader in the next election; Liberal voters are more divided

Consistent with findings from December 2022, just over half of Canadians think the Liberal Party should have someone other than Justin Trudeau as the leader in the next election (53%), while one in four think Trudeau should remain the leader (24%). Among those who usually vote Liberal however, there is more of an even split (42% prefer Trudeau as leader; 40% prefer someone else). Swing voters are more likely to prefer the party have someone else as leader (52%) than Trudeau (19%).

3

A majority of CPC voters would prefer Pierre Poilievre as the party leader going into the next election

Just over one in two Canadians think the Conservative party should have a new leader for the election (51%; 45% in December 2022), while 30 per cent think Poilievre should be the party leader. Of note, 71 per cent of usual CPC voters would prefer Poilievre be the party leader going into the next election (22% would prefer someone else), while 55 per cent of swing voters would prefer someone else as the leader (22% prefer Poilievre remain as leader).

4

Canadians are divided over Jagmeet Singh remaining as leader of the NDP in the next election

Around one in three Canadians each say they would prefer Jagmeet Singh remain as leader of the NDP in the next election (36%; 63% of usual NDP voters) or that the NDP should have someone else as the leader (31%; 22% of usual NDP voters), and another 30 per cent have no preference. There is similar division among swing voters, with 34 per cent who would prefer another leader (30% prefer Singh remain the leader).

THE GLOBE AND MAIL* n NANOS

Nanos conducted an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,055 Canadians, 18 years of age or older, between June 29th and 30th, 2023 as part of an omnibus survey. Participants were randomly recruited by telephone using live agents and administered a survey online. The sample included both land- and cell-lines across Canada. The results were statistically checked and weighted by age and gender using the latest Census information and the sample is geographically stratified to be representative of Canada.

Individuals randomly called using random digit dialling with a maximum of five call backs.

The margin of error for this survey is ±3.0 percentage points, 19 times out of 20.

This study was commissioned by the Globe and Mail and the research was conducted by Nanos Research.

Note: Charts may not add up to 100 due to rounding

METHODOLOGY

Element	Description
Research sponsor	The Globe and Mail
Population and Final Sample Size	1055 Randomly selected individuals.
Source of Sample	Nanos Hybrid Panel
Type of Sample	Probability
Margin of Error	±3.0 percentage points, 19 times out of 20.
Mode of Survey	RDD dual frame (land- and cell-lines) hybrid telephone and online omnibus survey
Sampling Method Base	The sample included both land- and cell-lines RDD (Random Digit Dialed) across Canada.
Demographics (Captured)	Atlantic Canada, Quebec, Ontario, Prairies, British Columbia; Men and Women; 18 years and older. Six digit postal code was used to validate geography.
Fieldwork/Validation	Individuals were recruited using live interviews with live supervision to validate work, the research questions were administered online
Number of Calls	Maximum of five call backs to those recruited.
Time of Calls	Individuals recruited were called between 12-5:30 pm and 6:30-9:30pm local time for the respondent.
Field Dates	June 29th to 30th, 2023.
Language of Survey	The survey was conducted in both English and French.
Standards	Nanos Research is a member of the Canadian Research Insights Council (CRIC) and confirms that this research fully complies with all CRIC Standards including the CRIC Public Opinion Research Standards and Disclosure Requirements. https://canadianresearchinsightscouncil.ca/standards/

Element	Description
Weighting of Data	The results were weighted by age and gender using the latest Census information (2021) and the sample is geographically stratified to ensure a distribution across all regions of Canada. See tables for full weighting disclosure
Screening	Screening ensured potential respondents did not work in the market research industry, in the advertising industry, in the media or a political party prior to administering the survey to ensure the integrity of the data.
Excluded Demographics	Individuals younger than 18 years old; individuals without land or cell lines, and individuals without internet access could not participate.
Stratification	By age and gender using the latest Census information (2021) and the sample is geographically stratified to be representative of Canada. Smaller areas such as Atlantic Canada were marginally oversampled to allow for a minimum regional sample.
Estimated Response Rate	12 percent, consistent with industry norms.
Question Order	Question order in the preceding report reflects the order in which they appeared in the original questionnaire.
Question Content	Topics on the omnibus ahead of the survey content included: views on political issues, views on economic issues, and factors impacting vacation plans.
Question Wording	The questions in the preceding report are written exactly as they were asked to individuals.
Research/Data Collection Supplier	Nanos Research
