

Nine in ten Canadians say the work of radiologists in our healthcare system is valuable – with perceptions of value steadily rising since 2018.

Key Findings

VALUE OF RADIOLOGISTS IN OUR HEALTHCARE SYSTEM CONTINUES TO STRENGTHEN

The perceived value of the work radiologists do in our healthcare system continues to rise with just over nine in ten Canadians who say their work is valuable ([92%](#)) compared to about eight in ten in 2022 ([83%](#)) and 2018 ([81%](#)). Another six per cent say their work is somewhat valuable, while less than one per cent say their work is not valuable or somewhat not valuable.

STRONG MAJORITY SUPPORT INVESTMENTS IN MRT AND SONOGRAPHER WORKFORCE

Over nine in ten Canadians support ([64%](#)) or somewhat support ([29%](#)) the Government making financial investments specifically aimed at hiring and retaining more medical radiation technologists and sonographers. Ontarians ([70%](#)), Canadians aged 55 plus ([70%](#)), and women ([71%](#)) are most likely to say support this.

CANADIANS SUPPORT AI PLAYING A ROLE IN MEDICAL IMAGING

Over two in three Canadians think it should be a high priority ([38%](#)) or somewhat high priority ([30%](#)) to set rules and regulations for the use of artificial intelligence in radiology in order to protect the safety of Canadians. About seven in ten Canadians also support ([31% support; 42% somewhat support](#)) investing in AI applications to help reduce the backlog for medical imaging in Canada.

Nine in ten Canadians say the work of radiologists in our healthcare system is valuable (92%) – an increase of 9-percentage points from 2022. Another six per cent say their work is somewhat valuable (6%).

METHODOLOGY

Nanos conducted an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,044 Canadians, 18 years of age or older, between September 2nd and 4th, 2023 as part of an omnibus survey. Participants were randomly recruited by telephone using live agents and administered a survey online. The results were statistically checked and weighted by age and gender using the latest Census information and the sample is geographically stratified to be representative of Canada.

Individuals were randomly called using random digit dialling with a maximum of five call backs.

The margin of error for a random survey of 1,044 Canadians is ±3.0 percentage points, 19 times out of 20.

The research was commissioned by the Canadian Association of Radiologists and was conducted by Nanos Research.

Note: Charts may not add up to 100 due to rounding.

Element	Description	Element	Description
Research sponsor	The Canadian Association of Radiologists	Weighting of Data	The results were weighted by age and gender using the latest Census information (2021) and the sample is geographically stratified to ensure a distribution across all regions of Canada. See tables for full weighting disclosure
Population and Final Sample Size	1,044 Randomly selected individuals.	Screening	Screening ensured potential respondents did not work in the market research industry, in the advertising industry, in the media or a political party prior to administering the survey to ensure the integrity of the data.
Source of Sample	Nanos Panel	Excluded Demographics	Individuals younger than 18 years old; individuals without land or cell lines, and individuals without internet access could not participate.
Type of Sample	Probability	Stratification	By age and gender using the latest Census information (2021) and the sample is geographically stratified to be representative of Canada. Smaller areas such as Atlantic Canada were marginally oversampled to allow for a minimum regional sample.
Margin of Error	±3.0 percentage points, 19 times out of 20.	Estimated Response Rate	10% percent, consistent with industry norms.
Mode of Survey	RDD dual frame (land- and cell-lines) hybrid telephone and online omnibus survey	Question Order	Question order in the preceding report reflects the order in which they appeared in the original questionnaire.
Sampling Method Base	The sample included both land- and cell-lines RDD (Random Digit Dialed) across Canada.	Question Content	Topics on the omnibus ahead of the survey content included: views on political issues, views on economic issues, housing, carbon taxation, immigration, art related activities and leadership of federal election parties.
Demographics (Captured)	Atlantic Canada, Quebec, Ontario, Prairies, British Columbia; Men and Women; 18 years and older. Six digit postal code was used to validate geography.	Question Wording	The questions in the preceding report are written exactly as they were asked to individuals.
Fieldwork/Validation	Individuals were recruited using live interviews with live supervision to validate work, the research questions were administered online	Research/Data Collection Supplier	Nanos Research
Number of Calls	Maximum of five call backs to those recruited.	Contact	Contact Nanos Research for more information or with any concerns or questions. http://www.nanos.co Telephone:(613) 234-4666 ext. 237 Email: info@nanosresearch.com.
Time of Calls	Individuals recruited were called between 12-5:30 pm and 6:30-9:30pm local time for the respondent.		
Field Dates	September 2 nd to 4 th , 2023.		
Language of Survey	The survey was conducted in both English and French.		
Standards	Nanos Research is a member of the Canadian Research Insights Council (CRIC) and confirms that this research fully complies with all CRIC Standards including the CRIC Public Opinion Research Standards and Disclosure Requirements. https://canadianresearchinsightscouncil.ca/standards/		

As one of North America's premier market and public opinion research firms, we put strategic intelligence into the hands of decision makers. The majority of our work is for private sector and public facing organizations and ranges from market studies, managing reputation through to leveraging data intelligence. Nanos Research offers a vertically integrated full service quantitative and qualitative research practice to attain the highest standards and the greatest control over the research process. www.nanos.co

nanos dimap analytika

This international joint venture between [dimap](http://www.dimap.com) and [Nanos](http://www.nanos.co) brings together top research and data experts from North American and Europe to deliver exceptional data intelligence to clients. The team offers data intelligence services ranging from demographic and sentiment microtargeting; consumer sentiment identification and decision conversion; and, data analytics and profiling for consumer persuasion. www.nanosdimap.com

EthicStratēgies

Ethic Strategies was created by the founding partners of [PAA Advisory](http://www.paaadvisory.com) and the [Nanos Research Corporation](http://www.nanos.co), both recognized leaders in research, advocacy, and advisory. Ethic provides bespoke strategic counsel, advice, and communications strategies to organizations facing serious issues. www.ethicstrategies.com

Nanos conducted an RDD dual frame (land- and cell- lines) hybrid telephone and online random survey of 1,044 Canadians, 18 years of age or older, between September 2nd and 4th, 2023. The margin of error for this survey is ±3.0 percentage points, 19 times out of 20. *Some results have been shaded due to small sample size (n-value under 30).
