

Canadians aware of Canada's net-zero targets and agree that the environment should be prioritized but concerned about energy prices

The research asked Canadians about their understanding of Canada's net zero targets, and gauged opinions on climate policy and priorities, concern for energy prices, and confidence in the country's ability to reduce greenhouse gas emissions.

Nanos conducted an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,071 Canadians, 18 years of age or older, between October 29th to 31st, 2023 as part of an omnibus survey.

The margin of error for a random survey of 1,000 Canadians is ± 3.0 percentage points, 19 times out of 20.

The research was commissioned by the University of Ottawa's Positive Energy program and was conducted by Nanos Research.

Key Findings – Net zero and emissions reductions

AWARENESS OF NET ZERO TARGET

Over seven in ten Canadians say they have heard about Canada’s net zero climate change target ([72%](#)). Those who say they have heard of Canada’s target most often think the term means ‘not emitting more carbon than is collected’ or ‘balancing out the impact’ ([38%](#)), which is also mentioned most often by those who have not heard of Canada’s target ([29%](#), [increased from 23% in May 2022](#)). Older Canadians (55 years plus) are more likely to be aware of Canada’s net zero targets ([76%](#) have heard of it) compared to younger Canadians (18-34 years old) ([67%](#) have heard of it).

MEETING CLIMATE TARGETS COMPARED TO OTHER ECONOMIES

Canadians are about three times more likely to say Canada should aim to be ahead ([42%](#); consistent with [41% in May 2022](#)) rather than behind ([14%](#), compared to [12% May 2022](#)) other major economies when it comes to meeting climate targets. Those who think Canada should aim to be ahead most often say this is because Canada should be a leader and lead by example ([30%](#)); while those who believe Canada should aim to be behind most often said climate change is not real, ideology and targets are a conspiracy ([19%](#)).

DRIVERS/DETRACTORS OF CONFIDENCE IN EMISSIONS REDUCTION

When asked what most undermines their confidence that Canada can reduce greenhouse gas emissions, Canadians most often say government inaction, empty promises and a lack of enforcement (eight percent; [compared to 12% in July 2021](#)) or continual investment in and dependence on oil, pipelines, fossil fuels and tar sands ([seven percent; compared to five percent in July 2021](#)). On the other hand, when asked what most contributes to their confidence, consistent with the previous wave, most Canadians said there is nothing or they have no confidence ([25%; compared to 23% in July 2021](#)).

Key Findings – Priorities and concerns

VIEWS ON TIMING TO ADDRESS CLIMATE CHANGE

A majority of Canadians ([53%](#)) believe it is the best time (score of seven to ten out of ten) for Canada to be ambitious in addressing climate change while over one in four ([28%](#)) believe it is the worst time (score of zero to three over ten). Those who think it is the best time (score seven to ten out of ten) most often said we need to act now climate change can't wait ([49%](#)); while those who believe it is the worst time (score 0-3 out of 10) most often said so because there are other priorities, the focus should be on health, vaccines, basic needs ([22%; an increase from 15% in May 2023](#)) followed by the current financial situation, inflation and upcoming recession ([21%, an increase from 17% in May 2023](#)).

PRIORITIZING THE ENVIRONMENT OR ECONOMIC GROWTH

Consistent with recent waves, Canadians are more likely to say that protecting the environment should be given priority, even if it causes slower economic growth and some loss of jobs ([55%; though this remains lower than the most recent high of 61% in September 2019](#)), rather than growth and creating jobs be the top priority, even if the environment suffers to some extent ([34%; compared to 37% in February 2022](#)). Liberal Party voters ([69%](#)) are far more likely to agree that protecting the environment should be given priority compared to Conservative party voters ([28%](#)).

CONCERN ABOUT ENERGY PRICES OVER THE NEXT SIX MONTHS

About two in three Canadians ([62%](#)) are concerned (score 7-10 out of 10) about the energy prices they pay for things like heating and transportation over the next six months, which is a slight decrease from the previous wave ([66% in May 2023](#)). Close to one in three rate their level of concern an outright 10 out of 10 ([31%, 32% in May 2023](#)).

An aerial photograph of a wind farm. Several large, white wind turbines are scattered across a vast, green agricultural field. The field is divided into rectangular plots. In the far distance, a city skyline is visible under a cloudy sky. The image has a dark, semi-transparent overlay, and a bright green triangle is in the top right corner.

Net zero and meeting climate targets

About seven in ten Canadians (72%) have heard about Canada's net zero target, which is a slight decrease compared to the last wave in May 2022 (76%).

Of note, only two in five Quebec residents (42%) have heard about Canada's net zero targets compared to over eight in ten individuals in the Prairies (85%).

Q – Have you heard or not heard about Canada’s net zero climate change target?

Source: Nanos Research, RDD dual frame hybrid telephone and online random survey, October 29th to 31st, 2023, n=1,071, accurate 3.0 percentage points plus or minus, 19 times out of 20.

Views on meaning of net zero

Consistent with the previous wave, Canadians most often think the term means not emitting more carbon than is collected or balancing out the impact, although the proportion giving this response has declined (36% in October 2023 compared to 48% in May 2022).

Of note, there is an increase in the number of Canadians who describe the term net zero as a government money grab or political scam (seven per cent of all Canadians) compared to the previous wave (three per cent in May 2022). Other responses suggesting skepticism on the part of Canadians are also on the rise.

Energy Affordability

Around three in five Canadians are concerned (score of 7-10 out of 10) (62%) about energy prices they will pay over the next six months, a decrease in concern from 66% in May 2023 and 68% in November 2022.

Consistent with the previous wave, one in three Canadians rate their level of concern a 10 out of 10 (31% in October 2023 compared to 32% in May 2023, see next slide).

Source: Nanos Research, RDD dual frame hybrid telephone and online random survey, October 29th to 31st, 2023, n=1,071, accurate 3.0 percentage points plus or minus, 19 times out of 20

Nanos conducted an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,071 Canadians, 18 years of age or older, between October 29th to 31st, 2023 as part of an omnibus survey. Participants were randomly recruited by telephone using live agents and administered a survey online. The results were statistically checked and weighted by age and gender using the latest Census information and the sample is geographically stratified to be representative of Canada.

Individuals were randomly called using random digit dialing with a maximum of five call backs.

The margin of error for a random survey of 1,071 Canadians is ± 3.0 percentage points, 19 times out of 20.

The research was commissioned by Positive Energy at the University of Ottawa and was conducted by Nanos Research.

Note: Charts may not add up to 100 due to rounding.

Element	Description	Element	Description
Research sponsor	Positive Energy at the University of Ottawa	Weighting of Data	The results were weighted by age and gender using the latest Census information (2021) and the sample is geographically stratified to ensure a distribution across all regions of Canada. See tables for full weighting disclosure.
Population and Final Sample Size	1071 Randomly selected individuals.	Screening	Screening ensured potential respondents did not work in the market research industry, in the advertising industry, in the media or a political party prior to administering the survey to ensure the integrity of the data.
Source of Sample	Nanos Probability Panel	Excluded Demographics	Individuals younger than 18 years old; individuals without land or cell lines, and individuals without internet access could not participate.
Type of Sample	Probability	Stratification	By age and gender using the latest Census information (2021) and the sample is geographically stratified to be representative of Canada. Smaller areas such as Atlantic Canada were marginally oversampled to allow for a minimum regional sample.
Margin of Error	±3.0 percentage points, 19 times out of 20.	Estimated Response Rate	13%, consistent with industry norms.
Mode of Survey	RDD dual frame (land- and cell-lines) hybrid telephone and online omnibus survey	Question Order	Question order in the tabulations appended to this report reflects the order in which they appeared in the original questionnaire.
Sampling Method Base	The sample included both land- and cell-lines RDD (Random Digit Dialed) across Canada.	Question Content	Topics on the omnibus ahead of the survey content included: views on political issues, views on economic issues, views on Israel-Palestine and views on foreign interference and the Liberal government, views on gun control in Canada and reconciliation with Indigenous Peoples in schools, workplaces and communities.
Demographics (Captured)	Atlantic Canada, Quebec, Ontario, Prairies, British Columbia; Men and Women; 18 years and older. Six digit postal code was used to validate geography.	Question Wording	The questions in the preceding report are written exactly as they were asked to individuals.
Fieldwork/Validation	Individuals were recruited using live interviews with live supervision to validate work, the research questions were administered online	Research/Data Collection Supplier	Nanos Research
Number of Calls	Maximum of five call backs to those recruited.	Contact	Contact Nanos Research for more information or with any concerns or questions. http://www.nanos.co Telephone:(613) 234-4666 ext. 237 Email: info@nanosresearch.com.
Time of Calls	Individuals recruited were called between 12-5:30 pm and 6:30-9:30pm local time for the respondent.		
Field Dates	October 29 th to 31 st , 2023.		
Language of Survey	The survey was conducted in both English and French.		
Standards	Nanos Research is a member of the Canadian Research Insights Council (CRIC) and confirms that this research fully complies with all CRIC Standards including the CRIC Public Opinion Research Standards and Disclosure Requirements. https://canadianresearchinsightscouncil.ca/standards/		

As one of North America's premier market and public opinion research firms, we put strategic intelligence into the hands of decision makers. The majority of our work is for private sector and public facing organizations and ranges from market studies, managing reputation through to leveraging data intelligence. Nanos Research offers a vertically integrated full service quantitative and qualitative research practice to attain the highest standards and the greatest control over the research process. www.nanos.co

nanos dimap analytika

This international joint venture between [dimap](http://www.dimap.com) and [Nanos](http://www.nanos.co) brings together top research and data experts from North American and Europe to deliver exceptional data intelligence to clients. The team offers data intelligence services ranging from demographic and sentiment microtargeting; consumer sentiment identification and decision conversion; and, data analytics and profiling for consumer persuasion. www.nanosdimap.com

EthicStratēgies

Ethic Strategies was created by the founding partners of [PAA Advisory](http://www.paaadvisory.com) and the [Nanos Research Corporation](http://www.nanos.co), both recognized leaders in research, advocacy, and advisory. Ethic provides bespoke strategic counsel, advice, and communications strategies to organizations facing serious issues. www.ethicstrategies.com
