National Map

MAKE DATA DRIVEN DECISIONS.

Have the intelligence to effectively target:

- ✓ Races that are too close to call
- ✓ MPs who are at risk and who are safe
- ✓ Battleground regions that are in play

Leverage the Power of the Nanos Time Map

Support your advocacy, political or public engagement needs with the Nanos Time Map. Monthly updates enable you to stay with the political pulse of Canadians.

What your subscription can do for you:

1. Integrate monthly federal riding projections into your advocacy work when interacting with Members of Parliament and parties;
2. Maximize advocacy resources by knowing which Members of Parliament to engage with and when;
3. Have the intelligence at your fingertips to know which parties or candidates are on the upswing or at risk; and,
4. Track swing ridings over time to identify battleground regions at play.

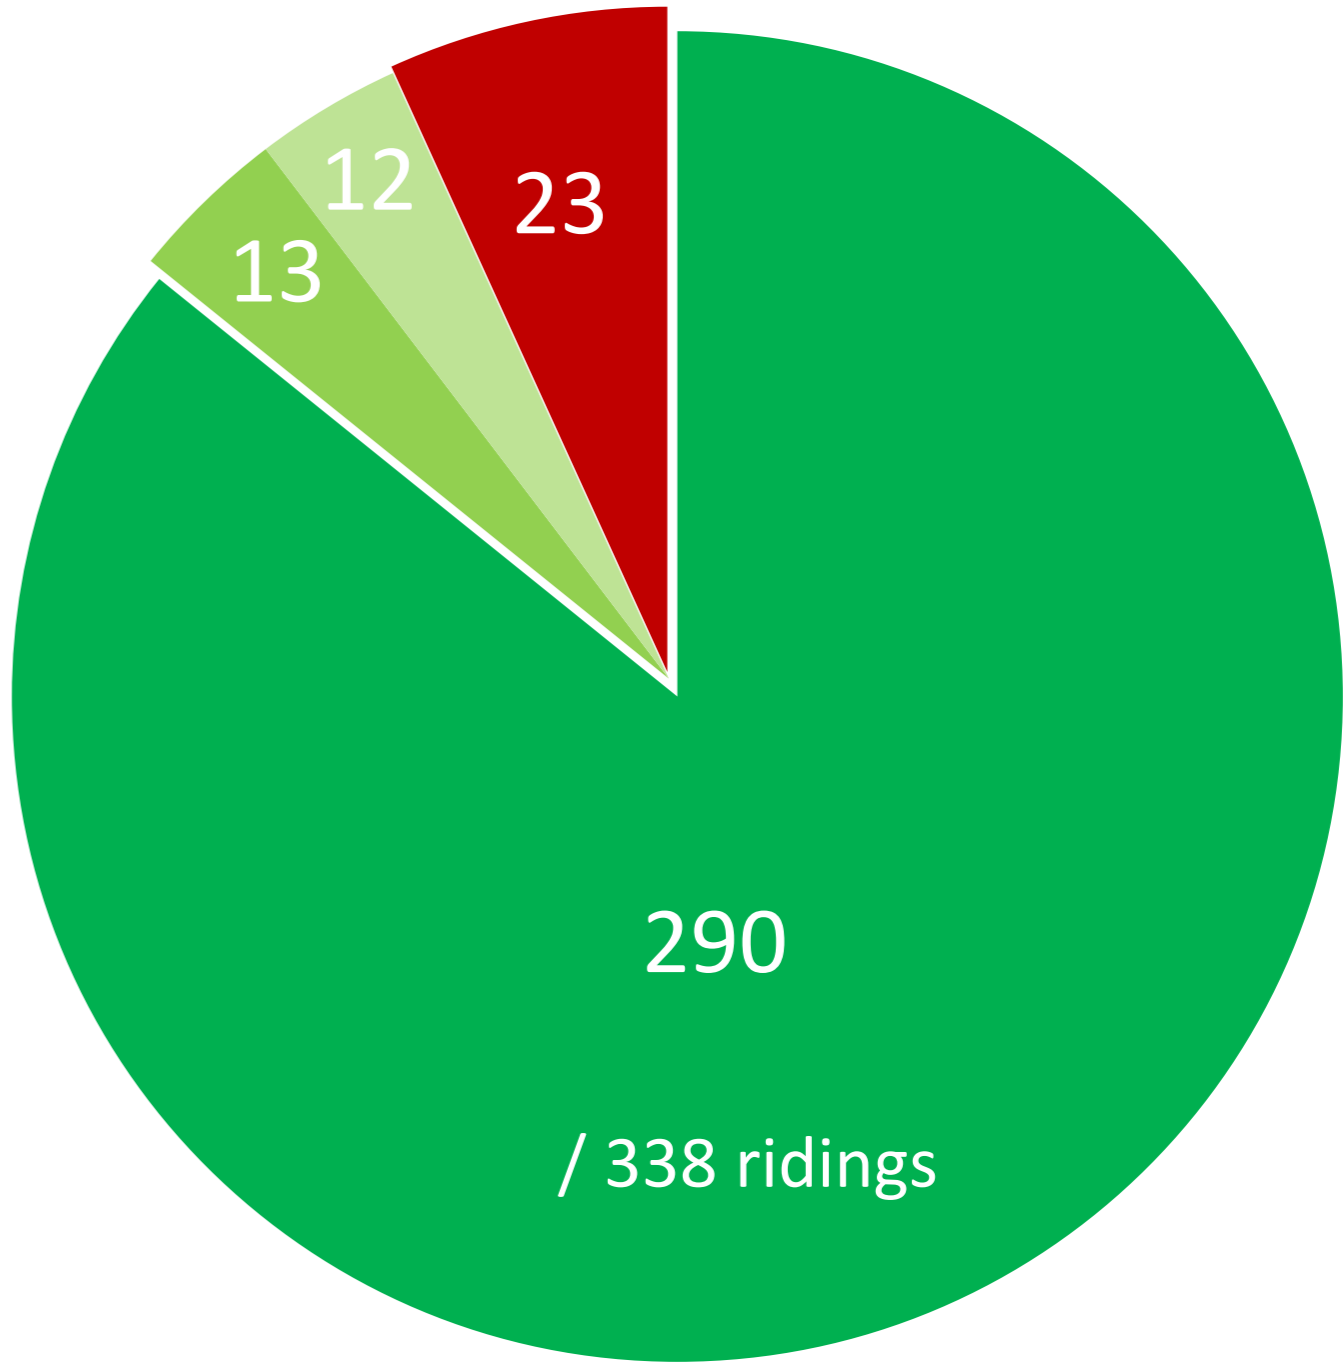

Nanos vs Election 2021

Nanos has a proven track record of success putting strategic intelligence into the hands of decision makers. Nanos Research is the pollster of record for CTV News and the Globe and Mail.

The Nanos Time Map Model accurately predicted the outcome in 290 out of 338 federal ridings in the 2021 Federal Election.

Counting ridings which were projected as too close to call (within 2% [A] and between 2-7% [B]) as correct, the accuracy of the Nanos model increases.

- Number of ridings outside A and B (margin of victory above 8%) accurately predicted
- Number of A ridings accurately predicted as too close to call (margin of victory within 2%)
- Number of B ridings accurately predicted as too close to call (margin of victory within 2-7%)
- Not predicted accurately

Mapping Services

NANOS TIME MAP

The Nanos Time Map Election Assistant includes the integration of Nanos political sentiment modelling, federal election data, and demographic data visualized in interactive maps.

TOMBSTONE DATA

The Nanos Time Map platform also houses extensive Elections Canada tombstone data, as well as demographic data from the Statistics Canada Census.

TRACK RECORD

The Nanos Time Map Model accurately predicted the outcome in 290 out of 338 federal ridings in the 2021 Federal Elections > 86%. Counting ridings which were projected as within 2% (A) and between 2-7% (B) as correct, the accuracy of the Nanos model increases to 93%.

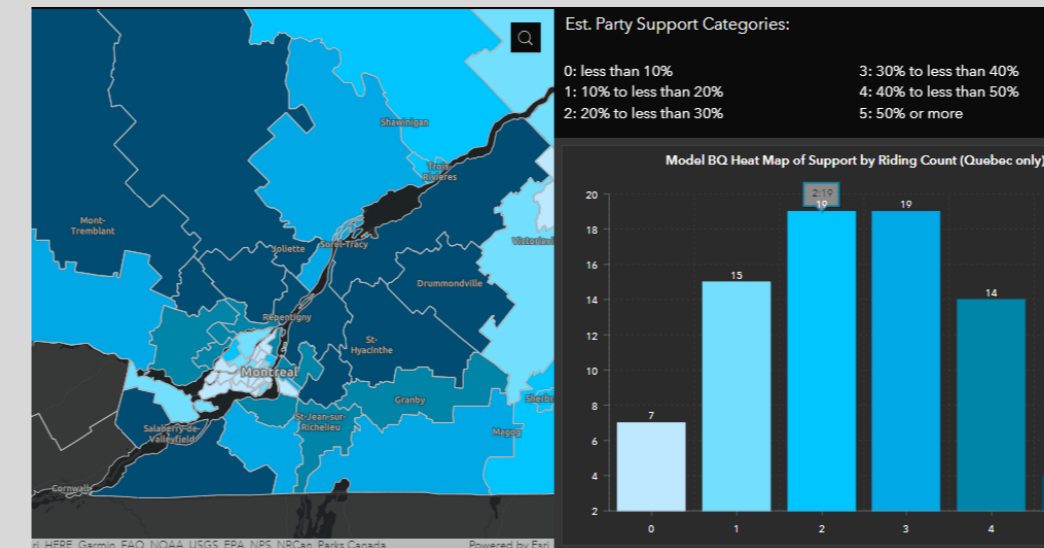

COST

Yearly subscriptions are \$7,260 (TimeMap) for a single log-in access. Note: Only yearly payments are accepted, and all costs and pricing are exclusive of applicable taxes. Visit <https://nanos.co/payments/> for more information or to subscribe.

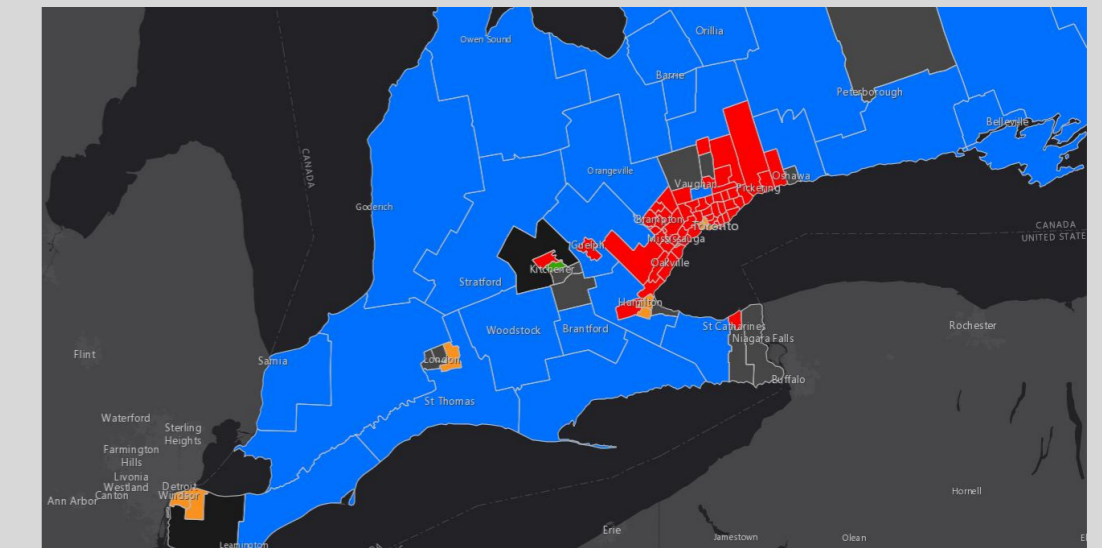

Key Features

- 2021, 2019, & 2015 Riding Level Election Data (voter turnout, heat maps of party support, and margins of victory)
- Current Nanos Riding Ballot Model Estimate (riding estimated winner including too close to call and close to call updated monthly)
- Current Nanos Margin Model Estimate (riding margin category winner updated monthly)
- Current Nanos Party Heat Maps of Support (riding support categories by party updated monthly)
- Nanos Election Projections (chart of model projections displayed over time by riding count)
- Demographic Data (census data displayed by riding)
