

# People divided on the impact of cabinet shuffles on their opinion of a government.

National survey released August 2024  
Field: July 29<sup>th</sup> to August 1<sup>st</sup>, 2024  
Submission 2024-2640

Nanos Research was retained by CTV News to conduct research among Canadians on the topic of cabinet shuffles.

Nanos conducted an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,035 Canadians, 18 years of age or older, between July 29<sup>th</sup> to August 1<sup>st</sup>, 2024 as part of an omnibus survey. Participants were randomly recruited by telephone using live agents and administered a survey online.

The margin of error for this survey is  $\pm 3.1$  percentage points, 19 times out of 20.

This study was commissioned by CTV News and the research was conducted by Nanos Research.

## Importance of cabinet shuffles in opinion of government

# Canadians

are statistically as likely to say cabinet shuffles are an important or somewhat important (49% combined) factor in how they feel about a government than to say they are unimportant or somewhat unimportant (48% combined).

Q – Are cabinet shuffles, that is, situations where the Prime Ministers changes ministers of the crown an important, a somewhat important, a somewhat unimportant or an unimportant factor in how you feel about a government?

Source: Nanos Research, RDD dual frame hybrid telephone and online random survey, July 29<sup>th</sup> to August 1<sup>st</sup>, 2024, n=1035, accurate 3.1 percentage points plus or minus, 19 times out of 20.

# METHODOLOGY

Nanos conducted an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,035 Canadians, 18 years of age or older, between July 29<sup>th</sup> and August 1<sup>st</sup>, 2024 as part of an omnibus survey. Participants were randomly recruited by telephone using live agents and administered a survey online. The sample included both land- and cell-lines across Canada. The results were statistically checked and weighted by age and gender using the latest Census information and the sample is geographically stratified to be representative of Canada.

Individuals randomly called using random digit dialling with a maximum of five call backs.

The margin of error for this survey is  $\pm 3.1$  percentage points, 19 times out of 20.

This study was commissioned by CTV News and the research was conducted by Nanos Research.

Note: Charts may not add up to 100 due to rounding.

Element	Description
Research sponsor	CTV News
Population and Final Sample Size	1035 Randomly selected individuals.
Source of Sample	Nanos Probability Panel
Type of Sample	Probability
Margin of Error	±3.1 percentage points, 19 times out of 20.
Mode of Survey	RDD dual frame (land- and cell-lines) hybrid telephone and online omnibus survey
Sampling Method Base	The sample included both land- and cell-lines RDD (Random Digit Dialed) across Canada.
Demographics (Captured)	Atlantic Canada, Quebec, Ontario, Prairies, British Columbia; Men and Women; 18 years and older. Six digit postal code was used to validate geography.
Fieldwork/Validation	Individuals were recruited using live interviews with live supervision to validate work, the research questions were administered online
Number of Calls	Maximum of five call backs to those recruited.
Time of Calls	Individuals recruited were called between 12-5:30 pm and 6:30-9:30pm local time for the respondent.
Field Dates	July 29 <sup>th</sup> to August 1 <sup>st</sup> , 2024.
Language of Survey	The survey was conducted in both English and French.
Standards	Nanos Research is a member of the Canadian Research Insights Council (CRIC) and confirms that this research fully complies with all CRIC Standards including the CRIC Public Opinion Research Standards and Disclosure Requirements. <a href="https://canadianresearchinsightscouncil.ca/standards/">https://canadianresearchinsightscouncil.ca/standards/</a>

Element	Description
Weighting of Data	The results were weighted by age and gender using the latest Census information (2021) and the sample is geographically stratified to ensure a distribution across all regions of Canada. See tables for full weighting disclosure
Screening	Screening ensured potential respondents did not work in the market research industry, in the advertising industry, in the media or a political party prior to administering the survey to ensure the integrity of the data.
Excluded Demographics	Individuals younger than 18 years old; individuals without land or cell lines, and individuals without internet access could not participate.
Stratification	By age and gender using the latest Census information (2021) and the sample is geographically stratified to be representative of Canada. Smaller areas such as Atlantic Canada were marginally oversampled to allow for a minimum regional sample.
Estimated Response Rate	Nine percent, consistent with industry norms.
Question Order	Question order in the preceding report reflects the order in which they appeared in the original questionnaire.
Question Content	Topics on the omnibus ahead of the survey content included: views on political issues, views on economic issues, views on retirement age and security spending for politicians and views on spending for natural disaster prevention.
Question Wording	The questions in the preceding report are written exactly as they were asked to individuals.
Research/Data Collection Supplier	Nanos Research
