Majority of Canadians think it is likely or somewhat likely that the proposed tariffs on Canadian goods entering the US will actually be introduced once Donald Trump takes power.

CTV NEWS

NANOS

The objective of the research was to gauge the views of Canadians on likelihood of new tariffs on Canadian goods following Trump's potential return to power.

Nanos conducted an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1084 Canadians, 18 years of age or older, between November 30th to December 4th , 2024 as part of an omnibus survey.

The margin of error for this survey is ±3.0 percentage points, 19 times out of 20.

The research was commissioned by CTV News and was conducted by Nanos Research.

Likelihood of new tariffs on Canadian goods following Trump's return to power

Q – Our next few questions are on trade negotiations. As you might know, U.S. President-elect Donald Trump has recently announced that he plans on imposing a 25% tariff on all imports from Canada and Mexico into the United-States. Do you think it is likely, somewhat likely, somewhat unlikely or unlikely that these proposed new tariffs on Canadian goods entering the US will actually be introduced once Donald Trump takes power?

- 🟩 Likely
- 🟩 Somewhat likely
- 🟥 Somewhat not likely
- 🟥 Not likely
- ⬜ Unsure
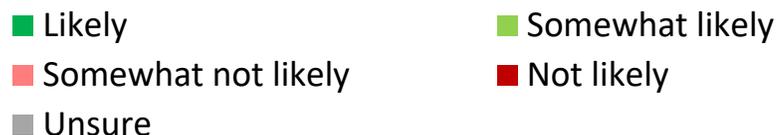

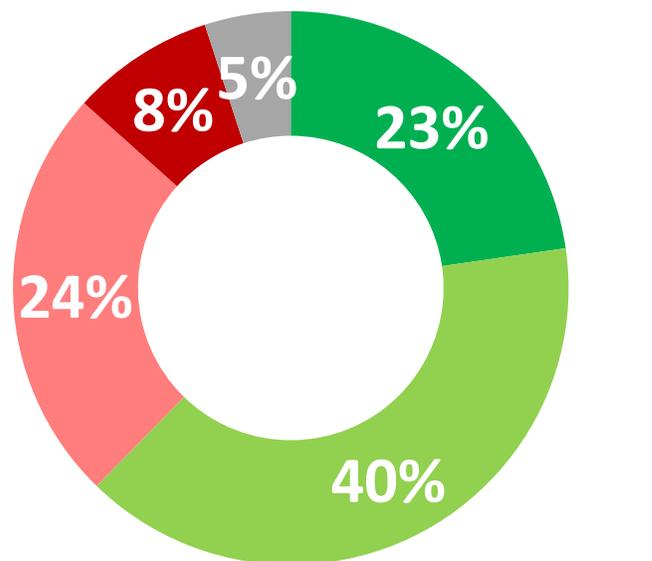

*Weighted to the true population proportion.
*Charts may not add up to 100 due to rounding.

3 in 5 Canadians

think it is likely or somewhat likely that these proposed new tariffs on Canadian goods entering the US will actually be introduced once Donald Trump takes power, while one in three think it is unlikely or somewhat unlikely. Older Canadians (55 plus) think these are more likely or somewhat likely to be imposed (67%) than those 18 to 34 (54%).

Source: Nanos Research, RDD dual frame hybrid telephone and online random survey, November 30th to December 4th, 2024, n=1084, accurate 3.0 percentage points plus or minus, 19 times out of 20.

Nanos conducted an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,084 Canadians, 18 years of age or older, between November 30th to December 4th, 2024 as part of an omnibus survey. Participants were randomly recruited by telephone using live agents and administered a survey online. The sample included both land- and cell-lines across Canada. The results were statistically checked and weighted by age and gender using the latest Census information and the sample is geographically stratified to be representative of Canada.

Individuals randomly called using random digit dialling with a maximum of five call backs.

The margin of error for this survey is ±3.0 percentage points, 19 times out of 20.

This study was commissioned by CTV News and the research was conducted by Nanos Research.

Note: Charts may not add up to 100 due to rounding.

METHODOLOGY

Element	Description
Research sponsor	CTV News
Population and Final Sample Size	1084 Randomly selected individuals.
Source of Sample	Nanos Probability Panel
Type of Sample	Probability
Margin of Error	±3.0 percentage points, 19 times out of 20.
Mode of Survey	RDD dual frame (land- and cell-lines) hybrid telephone and online omnibus survey
Sampling Method Base	The sample included both land- and cell-lines RDD (Random Digit Dialed) across Canada.
Demographics (Captured)	Atlantic Canada, Quebec, Ontario, Prairies, British Columbia; Men and Women; 18 years and older. Six digit postal code was used to validate geography.
Fieldwork/Validation	Individuals were recruited using live interviews with live supervision to validate work, the research questions were administered online
Number of Calls	Maximum of five call backs to those recruited.
Time of Calls	Individuals recruited were called between 12-5:30 pm and 6:30-9:30pm local time for the respondent.
Field Dates	November 30th to December 4th, 2024
Language of Survey	The survey was conducted in both English and French.
Standards	Nanos Research is a member of the Canadian Research Insights Council (CRIC) and confirms that this research fully complies with all CRIC Standards including the CRIC Public Opinion Research Standards and Disclosure Requirements. https://canadianresearchinsightscouncil.ca/standards/

Element	Description
Weighting of Data	The results were weighted by age and gender using the latest Census information (2021) and the sample is geographically stratified to ensure a distribution across all regions of Canada. See tables for full weighting disclosure
Screening	Screening ensured potential respondents did not work in the market research industry, in the advertising industry, in the media or a political party prior to administering the survey to ensure the integrity of the data.
Excluded Demographics	Individuals younger than 18 years old; individuals without land or cell lines, and individuals without internet access could not participate.
Stratification	By age and gender using the latest Census information (2021) and the sample is geographically stratified to be representative of Canada. Smaller areas such as Atlantic Canada were marginally oversampled to allow for a minimum regional sample.
Estimated Response Rate	12 percent, consistent with industry norms.
Question Order	Question order in the preceding report reflects the order in which they appeared in the original questionnaire.
Question Content	Topics on the omnibus ahead of the survey content included: views on political issues, views on economic issues.
Question Wording	The questions in the preceding report are written exactly as they were asked to individuals.
Research/Data Collection Supplier	Nanos Research
Contact	Contact Nanos Research for more information or with any concerns or questions. http://www.nanos.co Telephone:(613) 234-4666 ext. 237 Email: info@nanosresearch.com.
Tabulations	By region, age and gender

TECHNICAL NOTE

As one of North America's premier market and public opinion research firms, we put strategic intelligence into the hands of decision makers. The majority of our work is for private sector and public facing organizations and ranges from market studies, managing reputation through to leveraging data intelligence.   Nanos Research offers a vertically integrated full service quantitative and qualitative research practice to attain the highest standards and the greatest control over the research process. www.nanos.co

This international joint venture between dimap and Nanos brings together top research and data experts from North American and Europe to deliver exceptional data intelligence to clients. The team offers data intelligence services ranging from demographic and sentiment microtargeting; consumer sentiment identification and decision conversion; and, data analytics and profiling for consumer persuasion. www.nanosdimap.com

Ethic Strategies was created by the founding partners of PAA Advisory and the Nanos Research Corporation, both recognized leaders in research, advocacy, and advisory. Ethic provides bespoke strategic counsel, advice, and communications strategies to organizations facing serious issues. www.ethicstrategies.com
