

The research gauged the opinions among Canadians on military spending and defence cooperation. It explores whether Canada should change its defence budget in response to calls for higher NATO contributions and measures support for joining the ReArm Europe plan to boost arms production with European allies.

Nanos conducted an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,120 Canadians, 18 years of age or older, between June 1<sup>st</sup> and June 3<sup>rd</sup>, 2025 as part of an omnibus survey. The margin of error for this survey is  $\pm 2.9$  percentage points, 19 times out of 20.

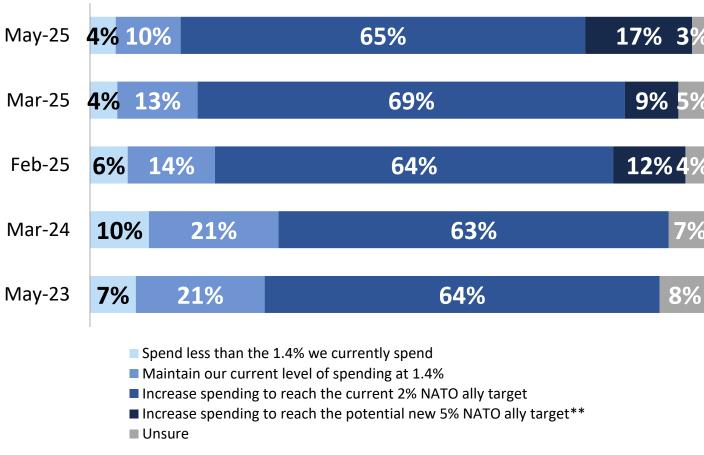

The statistical tabulations including the unweighted and weighted number of interviews can be accessed <a href="here">here</a>.

The research was commissioned by the Globe and Mail and was conducted by Nanos Research.

Most Canadians prefer Canada increase its military spending to reach the current two per cent NATO target. However, there is an increase since the previous wave of research in the proportion of Canadians who would like to see military spending reach five per cent of Canada's gross domestic product.

Q – President Donald Trump has now called on all NATO countries to increase their military spending to 5% of GDP, up from the current target of 2%. Canada hasn't hit the current spending threshold of 2% since the 1990s, and in 2024, Canada is estimated to have spent approximately 1.4 per cent of GDP on defence spending. Which of the following paths forward would you prefer? Q – [ASKED in 2024] In the 2023-24 fiscal year, Canada is estimated to spend approximately 1.4 per cent of GDP on defence spending. Our commitment as a NATO ally is to spend 2 per cent of GDP on defence spending. Canada has not spent 2% of GDP on defence since the 1980s. Which approach would you prefer for Canada's defence spending? Q – [ASKED IN 2023] In 2021, Canada spent approximately 1.4 per cent of GDP on defence spending. Our commitment as a NATO ally is to spend 2 per cent of GDP on defence spending. Canada has not spent 2% of GDP on defence since the 1980s. Which approach would you prefer for Canada's defence spending?

# Preferences for Canadian defense spending – Tracking

<sup>\*</sup>Weighted to the true population proportion.

Source: Nanos Research, RDD dual frame hybrid telephone and online random survey, June 1<sup>st</sup> to June 3<sup>rd</sup>, 2025, n=1120, accurate 2.9 percentage points plus or minus, 19 times out of 20.

<sup>\*</sup>Charts may not add up to 100 due to rounding.

<sup>\*\*</sup> Increase spending to reach the potential new 5% NATO ally target is a new response option added in the 2025 waves.

Source: Nanos Research, RDD dual frame hybrid telephone and online random survey, June 1<sup>st</sup> to June 3<sup>rd</sup>, 2025, n=1120, accurate 2.9 percentage points plus or minus, 19 times out of 20.

Nanos conducted an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,120 Canadians, 18 years of age or older, between June 1<sup>st</sup> and June 3<sup>rd</sup>, 2025, as part of an omnibus survey. Participants were randomly recruited by telephone using live agents and administered a survey online. The sample included both land- and cell-lines across Canada. The results were statistically checked and weighted by age and gender using the latest Census information and the sample is geographically stratified to be representative of Canada.

Individuals randomly called using random digit dialing with a maximum of five call backs.

The margin of error for this survey is  $\pm 2.9$  percentage points, 19 times out of 20.

This study was commissioned by the Globe and Mail, and the research was conducted by Nanos Research.
