

Majority concerned the US is a threat  
to Canadian sovereignty.

This survey gauged the views of Canadians on US as a threat to Canadian sovereignty and the US pulling out of NATO.

Nanos conducted an RDD dual frame (land- and cell-lines) hybrid telephone and online random survey of 1,009 Canadians, 18 years of age or older, between January 31<sup>st</sup> and February 4<sup>th</sup>, 2026 as part of an omnibus survey. Participants were randomly recruited by telephone using live agents. The sample included both land- and cell-lines across Canada. The results were statistically checked and weighted by age and gender using the latest Census information and the sample is geographically stratified to be representative of Canada.

Individuals randomly called using random digit dialling with a maximum of five call backs.

The margin of error for this survey is  $\pm 3.1$  percentage points, 19 times out of 20.

This study was commissioned by the CTV News and the research was conducted by Nanos Research.
